Weekly Price Watch: 21 August 2020

Directorate: Statistics & Economic Analysis

Sub-directorate: Economic Analysis

The price of local and international maize increased this week compared to the previous week. The price of local white maize increased by 3.8% and 2.9% respectively, whilst the USA maize price increased by 3.5%. The local maize price increased due to worries regarding the shortages of quality maize, while the USA maize price increased as a result of the storm damage that ravaged Iowa. The price of local and international wheat decreased compared to last week., decreasing by 2.9% and 3% respectively. The price of international wheat decreased as a result of increased supplies from Russia one of the major wheat producers. The price of local soybeans increased by 2.1% tracking higher international prices which increased by 2.3% as a result of increased buying from China. The price of sunflower increased by 0.6% whilst the sorghum price remained stable.

The units sold for class BP and HP increased by 4% and 8.7% respectively whilst declining by 12.1% respectively for class HO. The average purchase prices for class BP, HO and HP increased by 2.1%; 1.7% and 1.1% respectively compared to the previous week.

Latest News Developments

Banks in South Africa have provided voluntary relief on loans with a book value at risk of R537 billion in an effort to support the South African economy during Covid-19. According to the African Development Bank the Covid-199 pandemic related disruptions have exposed African economies over-dependence on high commodity prices and exports of raw materials to fund basic government services. The pandemic and economic impacts have forced a rethink of the current multilateral framework and what it means for the future. Reduced economic activity has resulted in a contraction in demand for Africa's key markets who were worst affected thus depressing export revenues as commodity prices have continued to plummet. Infrastructure South Africa (ISA), an entity of the Department of Public Works and Infrastructure has entered into a memorandum of agreement with the National Treasury and the Development Bank of Southern Africa (DBSA) for the R100-billion Infrastructure Fund launched by President Cyril Ramaphosa. The Infrastructure Fund is intended as government funding and ancillary support for co-financing of blended finance programs and projects; this includes financing from the local capital market and international financing institutions as a complement for the broader budgeting reforms that the government is undertaking to address problems in the infrastructure value chain. Limited government finances which have been worsened during the Covid-19 pandemic, affected the availability of investment resources. The initiative provides a greater need for government to work together to create an enabling environment for effective partnerships with the private sector, development finance institutions international financiers and the local capital market to enable the leveraging of additional resources. A key message has emanated from a report on the electrical vehicles market compiled for the Department of Trade, Industry and Competition and the National Association of Automobile Manufacturers of South Africa is that South African policy makers and automobile manufacturing sector stakeholders need to develop a coherent strategy for the shift to the production of electrical vehicles or fall behind global developments and lose their edge in the export market. Department of Trade, Industry and Competition director-general reported on Wednesday that government would continue to engage with those companies that had withdrawn investment pledges made in 2019 with the intention of reviving the projects should conditions change. Earlier this month, SAB, a division of the world's largest brewer AB InBev, indicated that it had halted planned investments worth R5-billion, partly because of the uncertainty caused by government's decision to ban alcohol sales as part of its strategy to contain the spread of Covid-19.
