### ECONOMIC INDICATORS AND TRENDS

#### 1. CROP ESTIMATES AND FORECASTS

##### Areas planted and sixth production forecast for summer crops for the 2023 production season

According to the sixth production forecast for summer crops by the Crop Estimates Committee (CEC) for the 2023 production season, the expected South African maize crop was 16,354 million tons, which was 5,7% more than the 15,470 million tons of the 2022 season and 15,4% or 2,180 million tons more than the five-year average of 14,174 million tons up to 2022.

The estimated area that South African commercial producers planted to maize during the 2023 season was 2,586 million ha. This was 1,4% or 36 900 ha less than the 2,623 million ha planted in the previous season. Of this area, 1,181 million ha (45,7%) were in the Free State, 556 000 ha (21,5%) in the North West and 508 500 ha (19,7%) in Mpumalanga.

The plantings of maize in the Free State decreased by an estimated 3,6%, from 1,224 million ha in 2022 to 1,181 million ha in 2023 and in the North West, it increased by 2,2%, from 544 000 ha to 556 000 ha. Plantings in Mpumalanga decreased by an estimated 1,3%, from 515 000 ha in 2022 to 508 500 ha in 2023.

The ratio of white to yellow maize plantings for 2023 is 59:41, as against 60:40 the previous season. The estimated white maize plantings were 1,521 million ha, which were 3,4% less than the previous season's 1,575 million ha, while the yellow maize plantings were estimated to be 1,065 million ha—1,6% more than the 1,048 million ha for 2022.

Most of the country's maize crop was produced in the Free State (44,2%), Mpumalanga (21,8%) and the North West (16,9%).

The production forecast for white maize was 8,638 million tons, which was 10,0% or 787 950 tons more than the 7,850 million tons of 2022 and 1,221 million tons more than the average of the five years up to 2022. The expected yield for white maize was 5,68 t/ha, as against 4,98 t/ha the previous season.

In the case of yellow maize, the production forecast was 7,716 million tons, which was 1,3% or 96 150 tons more than the 7,620 million tons of the previous season and 958 650 tons more than the five-year average up to 2022. The yield for yellow maize was expected to be 7,25 t/ha, as against 7,27 t/ha in 2022.

The expected sunflower seed crop was 758 610 tons, which was 10,3% less than the 845 550 tons of the previous season and 1,5% less than the average of 770 410 tons for the five years up to 2022. The area planted to sunflower seed was estimated at 555 700 ha, which was 17,2% less than the 670 700 ha planted in 2022. The expected yield was 1,37 t/ha, as against 1,26 t/ha the previous season.

The production forecast for soya beans was 2,755 million tons, which was 23,6% more than the 2,230 million tons of the previous season. The estimated area planted was 1,148 million ha, which was 24,1% or 223 000 ha more than the 925 300 ha planted in 2022. The expected yield was 2,40 t/ha, as against 2,41 t/ha in 2022.

The expected groundnut crop was 51 910 tons, which was 7,0% or 3 410 tons more than the 48 500 tons of the 2022 season and 4 054 tons less than the five-year average of 47 856 tons per annum up to 2022. The area planted to groundnuts was an estimated 31 300 ha, which was 27,9% or 12 100 ha less than the 43 400 ha planted the previous season. The expected yield was 1,66 t/ha, as against 1,12 t/ha in 2022.

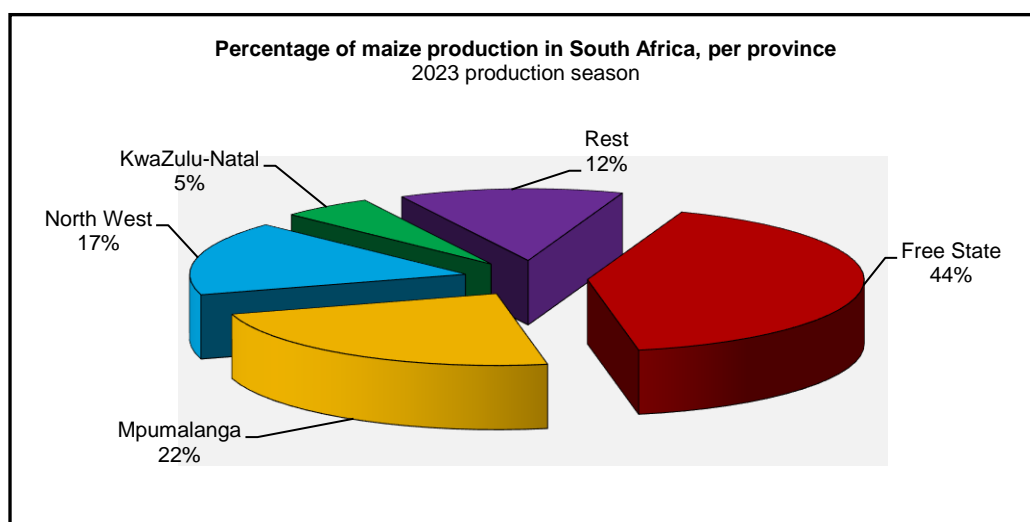

The production forecast for sorghum was 100 525 tons—2,5% less than the 103 140 tons of the previous season. The area planted to sorghum was estimated to be 34 000 ha, which was 8,6% or 3 200 ha less than the 37 200 ha planted in 2022. The expected yield was 2,96 t/ha, as against 2,77 t/ha the previous season.

The production of dry beans was expected to be 48 560 tons, which was 7,7% or 4 030 tons less than the 52 590 tons of the previous season and 13 595 tons less than the five-year average of 62 155 tons per annum up to 2022. The estimated area planted was 36 650 ha, which was 14,6% less than the 42 900 ha planted the previous season. The expected yield was 1,32 t/ha, as against 1,23 t/ha for 2022.

## Area estimates and sixth production forecast of summer field crops: 2023 production season\*

Crop	Area planted 2023	Sixth forecast 2023	Area planted 2022	Final crop 2022	Change – tons 2023 vs 2022
	ha	tons	ha	tons	%
White maize	1 521 300	8 637 950	1 575 000	7 850 000	+10,04
Yellow maize	1 064 800	7 716 150	1 048 000	7 620 000	+1,26
Total maize	2 586 100	16 354 100	2 623 000	15 470 000	+5,71
Sunflower seed	555 700	758 610	670 700	845 550	-10,28
Soya beans	1 148 300	2 755 300	925 300	2 230 000	+23,56
Groundnuts	31 300	51 910	43 400	48 500	+7,03
Sorghum	34 000	100 525	37 200	103 140	-2,54
Dry beans	36 650	48 560	42 900	52 590	-7,66

\* Forecasts and estimates exclude the non-commercial sector.

### Preliminary estimate of the area planted to winter cereal crops for the 2023 production season

The CEC also released the preliminary area estimate for winter crops on 26 July 2023.

The estimate for wheat was 532 300 ha, which is 6,09% less than the 566 800 ha planted in 2022. The main wheat-producing area was in the Western Cape, with 362 000 ha (68,0%), followed by the Free State with 71 000 ha (13,3%) and the Northern Cape with 39 000 ha (7,3%).

The preliminary area estimate for barley was 109 600 ha, which was 8,5% more than the 101 000 ha of the 2022 season.

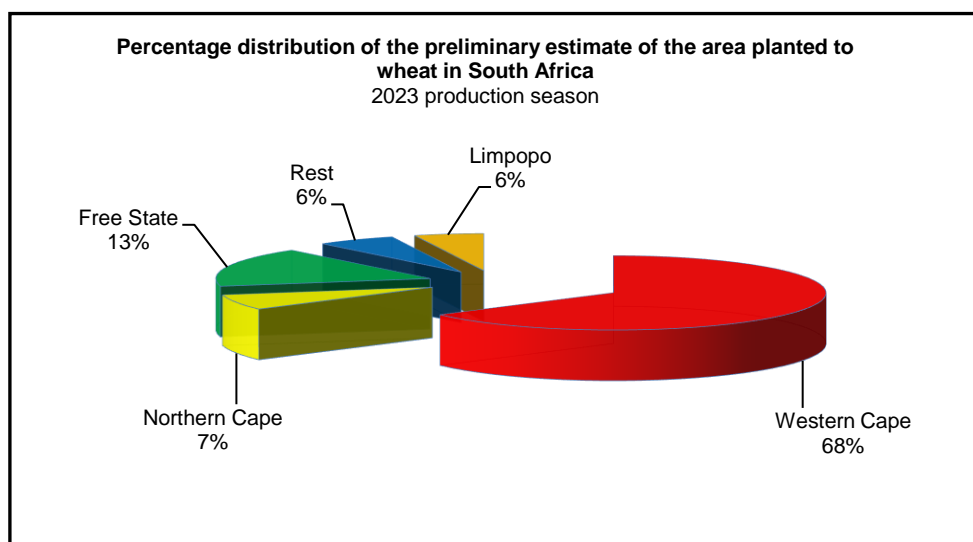

The area planted to canola was estimated at 128 100 ha, an increase of 3,7% from the previous season's plantings of 123 510 ha.

The preliminary area estimate for oats for the 2023 season was 26 000 ha, which was 3,7% less than the 27 000 ha of the previous season.

The preliminary area estimate for sweet lupines for the 2023 season is 18 000 ha, which was 14,3% less than the 21 000 ha of the 2022 season.

### Preliminary area estimates of winter cereals for the 2023 production season

Crop	Area planted 2023	Area planted 2022	Final crop 2022	Change – ha 2023 vs 2022
	ha	ha	tons	%
Wheat	532 300	566 800	2 110 000	-6,09
Barley	109 600	101 000	302 000	+8,51
Canola	128 100	123 510	210 000	+3,72
Oats	26 000	27 000	27 550	-3,70
Sweet lupines	18 000	21 000	15 750	-14,29

## 2. ECONOMIC INDICATORS OF THE SOUTH AFRICAN AGRICULTURAL SECTOR

Indicator (at current prices)	July '21 to June '22	July '22 to June '23	% change
Total gross farming income (R' million)	379 864	445 450	+17,3
Expenditure on intermediate goods and services (R' million)	219 079	248 726	+13,5
Total farming cost (R' million)	295 168	329 657	+11,7
Net farming income (R' million)	91 752	122 732	+33,8
Domestic terms of trade (2015 = 1)	1,00	1,03	+3,0

### Gross income from major products at current prices

Field crops (R' million)	July '21 to June '22	July '22 to June '23	% change
Maize	36 252	74 619	+105,8
Wheat	11 912	13 121	+10,2
Sugar cane	11 121	18 399	+65,4
Sunflower seed	7 986	6 659	-16,6
Cotton	375	384	+2,3
All field crops	103 208	143 455	+39,0
Horticulture (R' million)			
Vegetables (including potatoes)	29 390	34 054	+15,9
Deciduous and other fruit	30 388	31 918	+5,0
Citrus fruit	26 531	27 994	+5,5
Viticulture	7 185	7 021	-2,3
Subtropical fruit	5 999	6 886	+14,8
All horticultural products	109 820	119 432	+8,8
Animal products (R' million)			
Poultry meat	53 911	62 609	+16,1
Cattle and calves slaughtered	46 468	47 799	+2,9
Milk	22 055	25 853	+17,2
Eggs	11 500	13 040	+13,4
Sheep slaughtered	8 973	8 668	-3,4
All animal products	166 836	182 563	+9,4

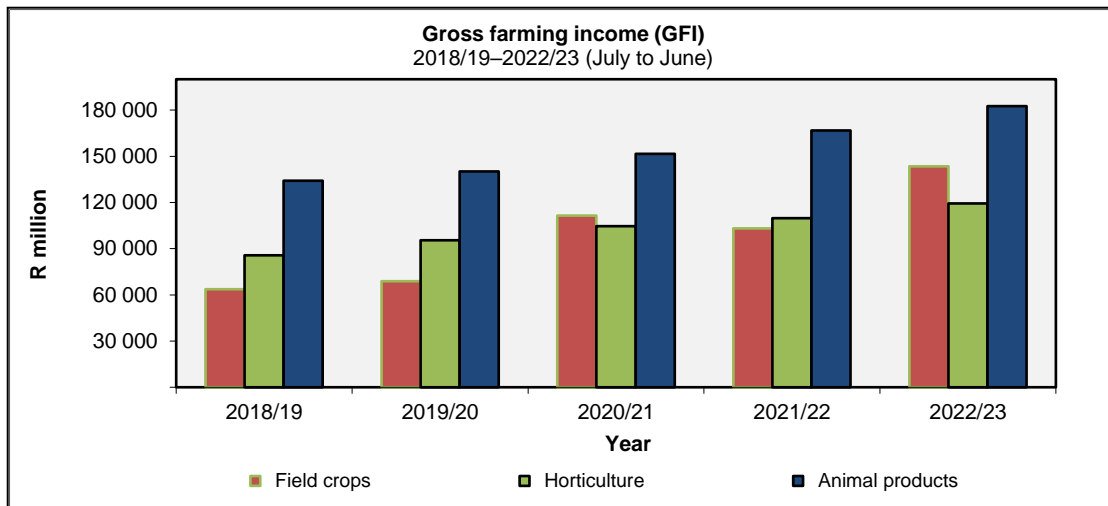

### 3. ECONOMIC OVERVIEW

This article gives an overview of the major macroeconomic trends in the agricultural sector for the period 1 July 2022 to 30 June 2023. Aggregates are compared with the period 1 July 2021 to 30 June 2022.

#### Gross farming income

*Gross farming income refers to that part of agricultural production that is marketed, together with the part that is for own consumption, both valued at basic prices.*

Gross farming income from all agricultural products increased by 17,3% to R445 450 million for the period ended 30 June 2023, as compared to R379 864 million in the previous period as the result of the increase in income from field crops, animal and horticultural products by 39,0%, 9,4% and 8,8%, respectively.

The income from animal products increased by 9,4% and was estimated to be R182 563 million. The main contributors were the increases in income from milk by 17,2%, poultry meat by 16,1%, eggs by 13,4% and cattle and calves slaughtered by 2,9%. The income from sheep slaughtered decreased by 3,4%.

The income from field crops increased substantially by 39,0% and amounted to R143 455 million. This was mainly the result of the increase in income of 105,8% from maize, sugar cane (65,4%), canola (26,6%), groundnuts (21,2%), soya beans (10,4%), wheat (10,2%) and cotton (2,3%). The income from dry beans decreased substantially by 84,4%, sunflower seed by 16,6% and grain sorghum (1,6%).

The income from horticultural products increased by R40 247 million (8,8%) and amounted to R119 432 million as the result of the increase in income earned from vegetables by 15,9%, subtropical fruit by 14,8%, citrus fruit by 5,5% and deciduous and other fruit by 5,0%. The income earned from viticulture decreased by 2,3%.

#### Expenditure on intermediate production inputs

*Expenditure on intermediate production inputs refers to the value of goods and services that were purchased to be consumed as inputs during the production process.*

Expenditure on intermediate goods and services increased by 13,5% to R248 726 million. This was due to the increases in expenditure on fertilisers by 22,0%, farm feeds by 20,0%, seed and plants and building and fencing material by 10,0% each, animal health and crop protection by 8,8%, maintenance and repairs of machinery and implements by 8,0%, packing material by 7,8%, fuel by 7,0% and farm services by 6,0%.

Farm feeds was the largest expenditure item and accounted for 38,8% to total expenditure, followed by fertilisers (11,6%), farm services (9,6%), fuel (8,1%), maintenance and repairs of machinery and implements (6,5%), seed and plants (6,4%), animal health and crop protection and building and fencing material (3,9%) each and packing material (3,8%).

## Prices received and paid by farmers

The average prices received by the farmers for their agricultural products increased by 10,7%. This was the result of the increase in prices of field crops by 15,6% and animal and horticultural products by 9,2% each.

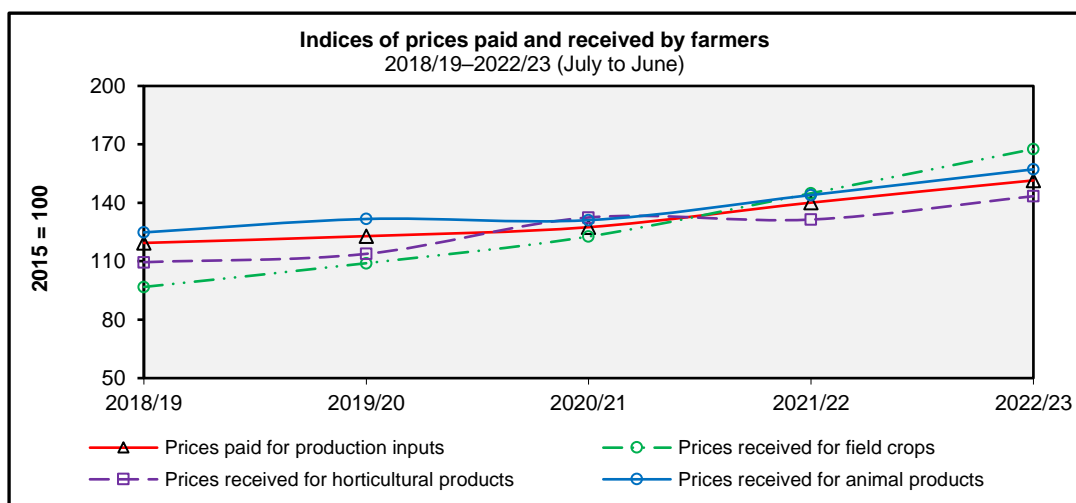

The increase of 15,6% in average price of field crops was the result of the increase in prices of summer grains by 21,9%, winter grains (17,9%), dry beans (14,5%), sugar cane (11,3%) and cotton (2,5%). The price of oilseeds decreased by 13,1%.

The increase of 9,2% in average price of animal products was driven by the increase in prices of poultry meat by 16,0%, dairy products by 15,1% and slaughtered stock by 2,5%. The price of pastoral products decreased by 8,9%.

The weighted average price of horticultural products increased by 9,2% as the result of the increase in prices of vegetables by 19,2%, viticulture (4,5%) and fruit (2,7%).

The prices paid for farming requisites, including machinery and implements, material for fixed improvements as well as intermediate goods and services increased by 7,9% for the period ended June 2023. The reason was mainly the result of the increase in prices of feeds by 18,5%, fuel (10,9%), building material (8,3%), animal health and crop protection (8,2%), fencing material (7,8%), trucks (7,4%), seeds (6,9%), maintenance and repairs of machinery and implements (6,4%), packaging material (4,7%), tractors (4,5%) and fertilisers (1,9%).

The domestic terms of trade increased by 3,0% from 1,00 to 1,03 due to improved prices received by the farmers for their products.

## Farming income and cash flow

The increase of 17,3% in gross farming against an increase of 13,5% in expenditure on production inputs resulted to a substantial increase of 33,8% in net farming income. Interest payments showed an increase of 9,6% while labour costs and rent payment increased by 7,1% each.

The farmers' cash flow also increased significantly by 34,3% to R119 737 million for the period ended June 2023, compared to R89 187 million the previous period.

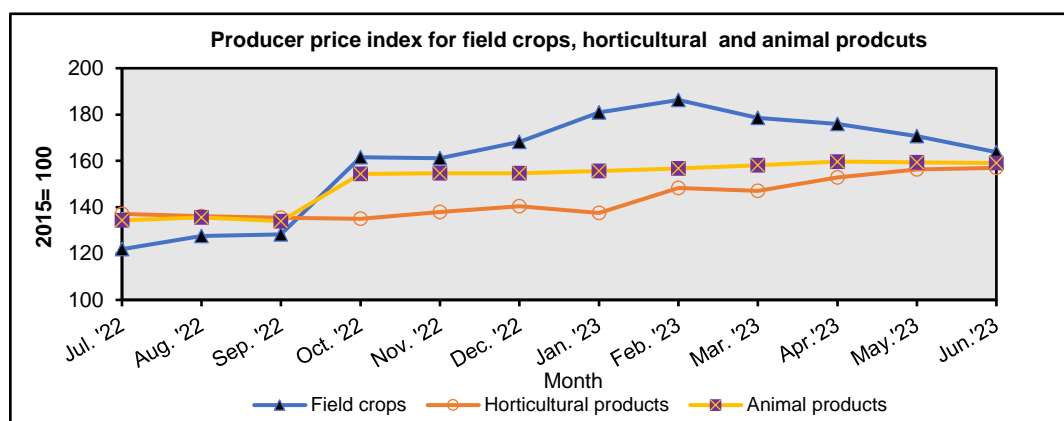

## Conclusion

The gross income of farmers increased by 17,3% for the period ended June 2023 because of the increase in income earned from field crops (39,0%), animal products (9,4%) and horticultural products (8,8%). The higher income can be attributed to improved production levels of field crops (especially maize, sugar cane, soya beans and groundnuts), horticultural products, better prices that farmers received for their agricultural products and a significant drop in prices of fertilisers.

## **SECTION B**

### **FRESH PRODUCE MARKETS OVERVIEW**

#### **FRESH MARKET STATISTICS AND GRAPHIC PRESENTATION OF SEASONAL FLUCTUATIONS IN QUANTITIES AND PRICES OF FRUIT AND VEGETABLES SOLD ON THE MAJOR FRESH PRODUCE MARKETS**

The purpose of this overview is to show the short-term price and volume trends (seasonal fluctuations) of various types of fruit and vegetables sold on major fresh produce markets and to make comparisons between the markets.

Market prices are determined by the interaction between supply and demand, which is influenced by various factors. Supply factors include climate, seasonal production, perishability of products and producers' reaction to prices realised in preceding periods, etc. Demand factors include consumer preferences, substitution between products and per capita income. Therefore, the seasonal pattern of quantities sold, and prices realised, may differ considerably among the various markets.

The graphs in this overview depict the trends for fruit and vegetables sold on the Johannesburg Fresh Produce Market and give an indication of the variations in monthly volumes sold and prices received based on the average for the five-year period 2018 to 2022.

Detailed information regarding the specific varieties of fruit and vegetables sold on the markets is available on request from:

Directorate: Statistics and Economic Analysis

Tel no: 012 319 8453

Fax: 012 319 8031
