<p>6. Description of content: Health Canada's Food Directorate completed a detailed safety assessment of a food additive submission seeking approval for the use of maltogenic <i>alpha</i>-amylase from <i>Bacillus licheniformis</i> MDT06-221 in the manufacture of bread, flour, whole wheat flour, unstandardized bakery products, and pasta. Amylase (maltogenic) from other source organisms is already permitted for use as a food enzyme in Canada in the manufacture of all the foods of interest to the petitioner with the exception of pasta. As no safety concerns were identified through Health Canada's assessment, the Department has enabled the use of the food additive maltogenic <i>alpha</i>-amylase from <i>B. licheniformis</i> MDT06-221 as described in the information document below, by modifying the <i>List of Permitted Food Enzymes</i>, effective 26 February 2019.
