<b>6. Description of content:</b> The objective of the notified document PMRL2023-37 is to consult on the listed maximum residue limit (MRL) for rimsulfuron that has been proposed by Health Canada's Pest Management Regulatory Agency (PMRA). <u>MRL (ppm)<sup>1</sup> Raw Agricultural Commodity (RAC) and/or Processed Commodity</u> 0.02 Low growing berries, except strawberries <sup>2</sup> (crop subgroup 13-07H; except lowbush blueberries <sup>3</sup> and lingonberries <sup>4</sup> )  <sup>1</sup> ppm = parts per million <sup>2</sup> As cranberry is the representative commodity of crop subgroup 13-07H, an MRL for the crop subgroup is being recommended. <sup>3</sup> Lowbush blueberries are excluded from this MRL action as an MRL of 0.05 ppm is already established for this commodity. <sup>4</sup> Lingonberries are excluded from this MRL action as an MRL of 0.01 ppm is already established for this commodity.  The commodities included in the listed crop groups/subgroups can be found on the <i>Residue Chemistry Crop Groups</i> webpage ( <a href="https://www.canada.ca/en/health-canada/services/consumer-product-safety/pesticides-pest-management/public/protecting-your-health-environment/pesticides-food/residue-chemistry-crop-groups.html">https://www.canada.ca/en/health-canada/services/consumer-product-safety/pesticides-pest-management/public/protecting-your-health-environment/pesticides-food/residue-chemistry-crop-groups.html</a> ) in the Pesticides section of the Canada.ca website.
