- 6. **Description of content:** The proposed draft Regulation concerns the review of existing MRLs for 2,5-dichlorobenzoic acid methylester, mandipropamid, prochloraz and profoxydim in certain food commodities. MRLs for these substances in certain commodities are changed: either increased or lowered. Lower MRLs are set after updating the limits of determination and/or deleting old uses which are not authorised any more in the European Union or for which a human health concern may not be excluded. The residue definition for some substances has also been updated.
- Objective and rationale: [X] food safety, [] animal health, [] plant protection,
   [] protect humans from animal/plant pest or disease, [] protect territory from other damage from pests.
- 8. Is there a relevant international standard? If so, identify the standard:
  - [X] Codex Alimentarius Commission (e.g. title or serial number of Codex standard or related text): Codex Maximum Residue Limits for mandipropamid and prochloraz. The list of Codex MRLs is available at: <u>http://www.fao.org/faowho-codexalimentarius/codex-texts/dbs/pestres/pesticide-detail/en/</u>

	Does this proposed regulation conform to the relevant international standard?		
	[ ] Yes [X] No		
	If no, describe, whenever possible, how and why it deviates from the international standard: The European Food Safety Authority published reasoned opinions on the review of the existing maximum residue levels for mandipropamid and prochloraz. Based on these opinions, Regulation (EC) No 396/2005 should be amended accordingly.
