<b>5. Title of the notified document:</b> Draft Commission Regulation (EU) amending Annexes II and V to Regulation (EC) No 396/2005 of the European Parliament and of the Council as regards maximum residue levels for chlorpyrifos and chlorpyrifos-methyl in or on certain products (Text with EEA relevance). <b>Language(s):</b> English. <b>Number of pages:</b> 7 <a href="https://members.wto.org/crnattachments/2019/SPS/EEC/19_7070_00_e.pdf">https://members.wto.org/crnattachments/2019/SPS/EEC/19_7070_00_e.pdf</a> <a href="https://members.wto.org/crnattachments/2019/SPS/EEC/19_7070_01_e.pdf">https://members.wto.org/crnattachments/2019/SPS/EEC/19_7070_01_e.pdf</a>
<b>6. Description of content:</b> The proposed draft Regulation concerns the review of the existing maximum residue levels (MRLs) for the substances chlorpyrifos and chlorpyrifos-methyl. MRLs for these substances are lowered. Lower MRLs are set after updating the limits of determination and/or deleting old uses which are not authorised any more in the European Union or for which a human health concern may not be excluded.
<b>7. Objective and rationale:</b> <input checked="" type="checkbox"/> food safety, <input type="checkbox"/> animal health, <input type="checkbox"/> plant protection, <input type="checkbox"/> protect humans from animal/plant pest or disease, <input type="checkbox"/> protect territory from other damage from pests.
<b>8. Is there a relevant international standard? If so, identify the standard:</b> <input checked="" type="checkbox"/> <b>Codex Alimentarius Commission (e.g. title or serial number of Codex standard or related text):</b> Codex Maximum Residue Limits 17 – chlorpyrifos: <a href="http://www.fao.org/fao-who-codexalimentarius/codex-texts/dbs/pestres/pesticide-detail/en/?p_id=17">http://www.fao.org/fao-who-codexalimentarius/codex-texts/dbs/pestres/pesticide-detail/en/?p_id=17</a> Codex Maximum Residue Limits 90 - chlorpyrifos-methyl: <a href="http://www.fao.org/fao-who-codexalimentarius/codex-texts/dbs/pestres/pesticide-detail/en/?p_id=90">http://www.fao.org/fao-who-codexalimentarius/codex-texts/dbs/pestres/pesticide-detail/en/?p_id=90</a> <input type="checkbox"/> <b>World Organization for Animal Health (OIE) (e.g. Terrestrial or Aquatic Animal Health Code, chapter number):</b> <input type="checkbox"/> <b>International Plant Protection Convention (e.g. ISPM number):</b>

<p><input type="checkbox"/> <b>None</b></p> <p><b>Does this proposed regulation conform to the relevant international standard?</b></p> <p><input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</p> <p><b>If no, describe, whenever possible, how and why it deviates from the international standard:</b> The European Food Safety Authority (EFSA) published statements on the available outcomes of the human health assessment in the context of the pesticides peer review of the active substance chlorpyrifos and chlorpyrifos-methyl. EFSA confirmed that for both substances serious concerns exist for human health: there is evidence for developmental neurotoxicity, which shows adverse neurological outcomes in children. Furthermore, a genotoxic potential cannot be excluded for the two substances. It is therefore not possible to set safe levels of exposure - including for residues in food. Based on these opinions, Regulation (EC) No 396/2005 should be amended following a risk analysis approach.</p>
