In the event, that the scope of works is extended to the supply, delivery and installation of reservoirs (water storage tanks), the appointed service should submit Certificate of compliance for all in-situ construction and portable structural installations. Moreover, a contingency should be enabled for a certificate of compliance for all electrical work executed to additional work i.e. the supply, delivery and installation of a brick & mortar, concrete precast or steel fabricated precast pump house with distribution board, pump switch and cabling to ignite borehole pump. A power connection for the bore hole pump switch should be created for the back-up generator.

3.3.1. INDICATIVE SCOPE OF WORKS

1.1. INTRODUCTION

It is the intention of the Department of Agriculture, Land Reform and Rural Development (DALRRD) to enter into a formal contract with Contractors that will carry out the services described above (Refer to Section E3.1). These Terms of Reference and the Contractor's registration will form the basis of the framework agreement.

Framework agreements are designed to allow the employer to invite bids from contractors to carry out work on an as and when instructed basis over a set term. Framework agreement is between two parties that establish the terms for the drilling and equipping of boreholes over a period of time within a broad scope of work without guaranteeing any quantum of goods, services or works.

The essential elements of a framework agreement are:

- 1.1.1. A framework agreement is only entered into with contractors who have the resources and the capacity to carry out work that is likely to be instructed.
- 1.1.2. A framework agreement uses Bills of Quantity as the basis by which contractors are to be remunerated for instructed work by the employer.
- 1.1.3. The scope of work of a framework agreement needs to identify the extent and location of the work covered by the contract as the employer may not instruct a contractor to provide work outside of the scope of work associated with the contract.
- 1.1.4. Contractors may only proceed with work associated with a task when an official task Order is issued.
- 1.1.5. Employers are not permitted to issue a task order after the end date of the term of The framework agreement
- 1.1.6. Any work commenced before the end of the term of a framework contract may Continue until the end date provided in the task order.

1.2. Section 1: Summary of Brief

Panel registration are requested from CIDB registered service providers with grading of **3CE to 9CE** Works. Service providers must have experience and qualification to undertake the drilling and equipping of boreholes as requested by the DALRRD.

1.3. Section 2: Project Description

1.3.1. Background

- a. The DALRRD seeks to accelerate delivery of an infrastructure and related services in order to improve access and meet its objective of providing quality service in the province.
- b. It is against this background that the Department is seeking to register Contractors, in the form of construction companies for the implementation of infrastructure (borehole) projects for the period **ending 2025** from date of appointment.

1.4. Section 3: Contract Purpose / Objectives

1.4.1. The DALRRD intends to **expand its data base** of service providers capable of implementing the drilling and equipping of boreholes construction works. In an effort to ensure that the Department consistently meet its service delivery targets, sufficient resources and effective measures need to be put in place.

1.4.2. To achieve this, the Department needs to have a readily available pool of contractors which can be called upon to assist in the roll out of infrastructure (borehole) projects as and when requested. The DALRRD would like to invite contractors to be included into a framework contract, with no guarantee of any quantum of works.

1.4.3. The objective is to have a readily available pool of contractors which can be called upon to perform work in the drilling and equipping of boreholes works on an “as-and-when” required basis.

1.4.4. In an effort to fast track the delivery and implementation of borehole projects, the Department seeks to establish a framework contract with contractors that can be called upon on an “ad hoc basis” to perform the following classes of work:

a. Civil Engineering (CE).

1.4.5. The Department intends to create a data base of registered contractors capable of undertaking the drilling and equipping of boreholes construction works and other similar projects.

1.4.6. As part of efforts to ensure that the Department consistently meets its service delivery targets as outlined in the Annual Performance Plan of the Department, proactive planning and effective measures which ensures sufficient resources can be deployed within a short period of time are put in place.

1.4.7. To achieve objectives stated above, the Department will request and accept Expression of Interest pool of registered, suitably qualified and experienced

contractors in the **CIDB CE category of works** and grading levels who are readily available to assist with the implementation of borehole projects, which can be requested within a short period of time as and when required to commence with projects.

1.4.8. The Department will appoint the contractors into the framework contract, with no guarantee of any quantum of works as the objective is to have a readily available pool of contractors which can be called upon to perform work in the drilling and equipping of boreholes construction works on an as-and-when basis for a period ending 2025.

1.5. Envisaged scope of work which will be covered by the framework

1.5.1. The framework contract will be for suitably qualified and experienced contractors in the CIDB Civil Engineering (CE) category and grading levels who readily available to assist with the implementation of borehole projects, which can be requested within a short period of time as and when required to commence with projects.

1.5.2. The scope of work will broadly include the following type of projects:

- a. The drilling and equipping of boreholes construction work which fall under the **CIDB CE** category and various grading levels on “as and when” needed.
- b. However, the department reserves the right to go on a normal tender process for any of the categories works listed above should it opt to do so.
- c. The essential elements of a framework agreement are:
 - i. A framework agreement is only entered into with contractors who have the resources and the capacity to carry out work that is likely to be instructed and each contractor must submit a separate bid for each category of works they are bidding for. Contractors will only be allowed to bid for their current CIDB grading level.
 - ii. A framework agreement uses Bills of Quantity as the basis by which contractors are to be remunerated for instructed work by the employer.
 - iii. The scope of work of a framework agreement needs to identify the extent and location of the work covered by the contract as the employer may not instruct a contractor to provide work outside of the scope of work associated with the contract.
 - iv. Contractors may only proceed with work associated with a task when an official task order is issued to do so.
 - v. Employers are not permitted to issue a task order after the end date of the term of the framework agreement.

Tenderers will be invited to submit tender offers based on a search criterion as well as their position on the data base. Tenderers will be repositioned on the data base upon appointment or upon the submission of a tender offer.
- b. A minimum of five (5) panel registered service providers will be requested by the employer to price, a detailed bill of quantities in a competitive bidding process in line with the Preferential Procurement Policy Framework Act (PPPFA).
- c. Where applicable bids/quotation will be evaluated in line with the applicable Local Content and production requirements (SBD 6.2)
- d. The applicable preference point system will be evaluated when projects are implemented on “as and when bases” based on the estimates of each project.
- e. Bidders will be evaluated according to the 80/20 or 90/10 points system depending on the estimated value of the project.
- f. Issuing of task order will be done on an as and when basis for specific tasks and the Department will invite contractors to submit responses for such a tasks order.
- g. The Department will invite quotations on “as and when basis”. The issuing of specific tasks orders will be informed by the evaluation of quotations received from firms which will be appointed to perform such a task if their quotation is the most favourable quotation

The appointed service providers will be remunerated based on work completed, subject to measurement of a priced bill of quantities, verified by the employer’s delegated project manager or consultant.

1.7. Service level agreement
