THE NATIONAL INDUSTRIAL PARTICIPATION PROGRAMME

INTRODUCTION

The National Industrial Participation (NIP) Programme, which is applicable to all government procurement contracts that have an imported content, became effective on the 1 September 1996. The NIP policy and guidelines were fully endorsed by Cabinet on 30 April 1997. In terms of the Cabinet decision, all state and parastatal purchases / lease contracts (for goods, works and services) entered into after this date, are subject to the NIP requirements. NIP is obligatory and therefore must be complied with. The Industrial Participation Secretariat (IPS) of the Department of Trade and Industry (DTI) is charged with the responsibility of administering the programme.

1 PILLARS OF THE PROGRAMME

- 1.1 The NIP obligation is benchmarked on the imported content of the contract. Any contract having an imported content equal to or exceeding US\$ 10 million or other currency equivalent to US\$ 10 million will have a NIP obligation. This threshold of US\$ 10 million can be reached as follows:
- (a) Any single contract with imported content exceeding US\$10 million.
or
 - (b) Multiple contracts for the same goods, works or services each with imported content exceeding US\$3 million awarded to one seller over a 2 year period which in total exceeds US\$10 million.
or
 - (c) A contract with a renewable option clause, where should the option be exercised the total value of the imported content will exceed US\$10 million.
or
 - (d) Multiple suppliers of the same goods, works or services under the same contract, where the value of the imported content of each allocation is equal to or exceeds US\$ 3 million worth of goods, works or services to the same government institution, which in total over a two (2) year period exceeds US\$10 million.
- 1.2 The NIP obligation applicable to suppliers in respect of sub-paragraphs 1.1 (a) to 1.1 (c) above will amount to 30 % of the imported content whilst suppliers in respect of paragraph 1.1 (d) shall incur 30% of the total NIP obligation on a *pro-rata* basis.
- 1.3 To satisfy the NIP obligation, the DTI would negotiate and conclude agreements such as investments, joint ventures, sub-contracting, licensee production, export promotion, sourcing arrangements and research and development (R&D) with partners or suppliers.

- 1.4 A period of seven years has been identified as the time frame within which to discharge the obligation.

2 REQUIREMENTS OF THE DEPARTMENT OF TRADE AND INDUSTRY

- 2.1 In order to ensure effective implementation of the programme, successful bidders (contractors) are required to, immediately after the award of a contract that is in excess of **R10 million** (ten million Rands), submit details of such a contract to the DTI for reporting purposes.

- 2.2 The purpose for reporting details of contracts in excess of the amount of R10 million (ten million Rands) is to cater for multiple contracts for the same goods, works or services; renewable contracts and multiple suppliers for the same goods, works or services under the same contract as provided for in paragraphs 1.1.(b) to 1.1. (d) above.

3 BID SUBMISSION AND CONTRACT REPORTING REQUIREMENTS OF BIDDERS AND SUCCESSFUL BIDDERS (CONTRACTORS)

- 3.1 Bidders are required to sign and submit this Standard Bidding Document (SBD 5) together with the bid on the closing date and time.

- 3.2 In order to accommodate multiple contracts for the same goods, works or services; renewable contracts and multiple suppliers for the same goods, works or services under the same contract as indicated in sub-paragraphs 1.1 (b) to 1.1 (d) above and to enable the DTI in determining the NIP obligation, successful bidders (contractors) are required, immediately after being officially notified about any successful bid with a value in excess of R10 million (ten million Rands), to contact and furnish the DTI with the following information:

- Bid / contract number.
- Description of the goods, works or services.
- Date on which the contract was accepted.
- Name, address and contact details of the government institution.
- Value of the contract.
- Imported content of the contract, if possible.

- 3.3 The information required in paragraph 3.2 above must be sent to the Department of Trade and Industry, Private Bag X 84, Pretoria, 0001 for the attention of Mr Elias Malapane within five (5) working days after award of the contract. Mr Malapane may be contacted on telephone (012) 394 1401, facsimile (012) 394 2401 or e-mail at Elias@thedti.gov.za for further details about the programme.

4 PROCESS TO SATISFY THE NIP OBLIGATION

- 4.1 Once the successful bidder (contractor) has made contact with and furnished the DTI with the information required, the following steps will be followed:
- a. the contractor and the DTI will determine the NIP obligation;
 - b. the contractor and the DTI will sign the NIP obligation agreement;

- c. the contractor will submit a performance guarantee to the DTI;
- d. the contractor will submit a business concept for consideration and approval by the DTI;
- e. upon approval of the business concept by the DTI, the contractor will submit detailed business plans outlining the business concepts;
- f. the contractor will implement the business plans; and
- g. the contractor will submit bi-annual progress reports on approved plans to the DTI.

4.2 The NIP obligation agreement is between the DTI and the successful bidder (contractor) and, therefore, does not involve the purchasing institution.

CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
 - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
 - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- 4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

TERMS OF REFERENCE FOR THE APPOINTMENT OF A SERVICE PROVIDER TO CONDUCT A METADATA COMPLIANCE ASSESSMENT AT ALL NATIONAL DEPARTMENTS AGAINST THE REQUIREMENTS OF SECTION 12 AND 14 OF THE SPATIAL DATA INFRASTRUCTURE ACT, 2003 (ACT 54 OF 2003), WITHIN TWELVE MONTHS (12) MONTHS

1. INTRODUCTION

- 1.1. The National Department of Agriculture, Land Reform and Rural Development (DALRRD) requires the professional services of a Service Provider(s) to conduct a metadata compliance assessment at all national departments against the requirements of section 12 and 14 of the Spatial Data Infrastructure Act, 2003 (Act No. 54 of 2003), within twelve (12) months.

2. BACKGROUND

- 2.1. Geospatial data is defined by the Nations Committee of Experts on Global Geospatial Information Management (UN-GGIM) as a nation's 'digital currency' for evidence-based decision-making). It forms the basis of every decision made by the government because "everything happens somewhere". As a key asset, it must be well managed, to be trusted for use. The Spatial Data Infrastructure (SDI) Act, 2003 (Act No. 54 of 2003) provides a legal framework for the management of geospatial in the Republic.
- 2.2. The SDI Act came into full operation in 2015 and establishes the South African Spatial Data Infrastructure, the Committee for Spatial Information and the Electronic Metadata Catalogue. The main objective of the SDI Act is to regulate the capturing and management of geospatial data within the Republic, facilitate the sharing and reuse of geospatial data and ultimately avoid the duplication in the collection of management of geospatial data.
- 2.3. Section 12 of the SDI Act states that a data custodian must capture and maintain metadata for any spatial information held by it in accordance with the SDI Act. Metadata is a set of data that describes and gives information about the data. The information about the data includes the condition of the data, currency, relevancy, usability, quality statement, limitations and

other elements as defined in the South African National Standard (SANS) 1878: Metadata Standard. In a nutshell, metadata gives comfort to the person using the data because limitations of the data are declared upfront and it gives credibility to the decision(s) taken from using the data.

- 2.4. The former Minister for Rural Development and Land Reform in line with section 20 of the SDI Regulations made regulations in respect of the measures relating to the avoidance of duplication of capture, safeguarding the integrity of captured spatial information, and access to and distribution of spatial information. The regulations came into effect in November 2017. SDI Regulation 3 prescribes how the data custodian must capture and maintain metadata, including adherence to the metadata standard as published by the Department and/or the South African Bureau of Standards. In 2018, the Minister published a list of standards for implementation in line with SDI Regulation 3 and one of the standards published in the metadata standard.
- 2.5. The systems and procedures are in place for the implementation of sections 12 and 14 of the SDI Act. It is now upon data custodians to comply by capturing and maintaining metadata for any spatial information held by it in accordance with the SDI Act. In line with section 8 of the Base Dataset Custodianship policy, the CSI, assisted by the Department, will monitor adherence to the policy through various means, including audits and inspections. The preliminary investigation conducted indicates very low levels of compliance and hence the initiation of this project to have a comprehensive view on levels of compliance. Additionally, develop a plan to support data custodians that are not complying.

3. SCOPE AND DEFINITION OF WORK

- 3.1 The Service Provider is expected to:
 - 3.1.1 Develop a metadata compliance assessment model in line with sections 12 and 14 of the Spatial Data Infrastructure Act, 2003 (Act No. 54 of 2003).
 - 3.1.2 Identify data custodians at a national department of government to be assessed in line with the definition of a data custodian as provided in the SDI Act.
 - 3.1.3 Using investigative methods must conduct stakeholder engagements to communicate the draft Metadata Compliance Assessment Model. This process must allow for discussion and communication of the needs, concerns and questions from relevant stakeholders.
 - 3.1.4 Conduct a metadata compliance assessment at all data custodians at a national level of government.
 - 3.1.5 Prepare and submit a final assessment report and final structured intervention plan for approval and sign off the project by DALRRD.

4. PROJECT PHASES

The project will occur in the following phases:

Phase 1: Inception Report

An inception workshop is to be held between the consultant and the Department of Agriculture, Land Reform and Rural Development (DALRRD) wherein the aspects of the project will be discussed and agreed upon. Following this workshop, a comprehensive inception report and a detailed work plan, including a stakeholder engagement plan are to be drawn up by the consultant team. The work plans must identify all tasks, allocate human resources, identify time frames and ensure coordination between all activities in line with the proposal submitted. The inception report and work plans are to be approved by the relevant Project Directors in DALRRD.

Phase 2: Review and Research report

The Service Provider must conduct research and review literature and any other relevant research of relevant media and documentation of Spatial Data Infrastructures. The Literature review document should include case studies on metadata management in an organisation, including benchmarks, best practices, current and future trends defined through research of relevant media. In addition, the Service Provider must identify data custodians at national departments of government to be assessed in line with the definition of a data custodian as provided in the SDI Act.

Phase 3: Develop an assessment model and engage with stakeholders

The Service Provider must use the best practices locally and globally, including current and future trends to develop a draft Metadata Compliance Assessment Model. The Service Provider using investigative methods must conduct stakeholder interviews to communicate the draft Metadata Compliance Assessment Model. The Service Provider must engage and consult with relevant data custodians on the draft framework to get buy-in and inputs. The Service Provider must also consult with the Committee for Spatial Information. This process will allow for discussion and communication of the needs, concerns and questions from relevant stakeholders. Based on the inputs received review the model and submit it to DALRRD.

Phase 4: Test model with a few data custodians and review

The Service Provider must after obtaining the endorsement of the draft Metadata Compliance Assessment Model from the Department, test/pilot the model with at least two data custodians. Based on the pilot/testing results, the Service Provider must review the model and submit a final Metadata Assessment Model for approval and implementation.

Phase 5: Conduct assessments and submit a report

Using the approved Metadata Assessment Model, the Service Provider must conduct an assessment to determine levels of compliance by data custodians at a national level of government. The report

must include: a stakeholder engagement report, assessment report, structured intervention program, and a compliance monitoring plan for each Department/Data custodian.

Phase 6: Finalisation and approval

Submit a final report for review by the Committee for Spatial Information and approval and sign off the project by DALRRD.

5. DELIVERABLES
