THE NATIONAL INDUSTRIAL PARTICIPATION PROGRAMME

INTRODUCTION

The National Industrial Participation (NIP) Programme, which is applicable to all government procurement contracts that have an imported content, became effective on the 1 September 1996. The NIP policy and guidelines were fully endorsed by Cabinet on 30 April 1997. In terms of the Cabinet decision, all state and parastatal purchases / lease contracts (for goods, works and services) entered into after this date, are subject to the NIP requirements. NIP is obligatory and therefore must be complied with. The Industrial Participation Secretariat (IPS) of the Department of Trade and Industry (DTI) is charged with the responsibility of administering the programme.

1 PILLARS OF THE PROGRAMME

- 1.1 The NIP obligation is benchmarked on the imported content of the contract. Any contract having an imported content equal to or exceeding US\$ 10 million or other currency equivalent to US\$ 10 million will have a NIP obligation. This threshold of US\$ 10 million can be reached as follows:
- (a) Any single contract with imported content exceeding US\$10 million.
or
 - (b) Multiple contracts for the same goods, works or services each with imported content exceeding US\$3 million awarded to one seller over a 2 year period which in total exceeds US\$10 million.
or
 - (c) A contract with a renewable option clause, where should the option be exercised the total value of the imported content will exceed US\$10 million.
or
 - (d) Multiple suppliers of the same goods, works or services under the same contract, where the value of the imported content of each allocation is equal to or exceeds US\$ 3 million worth of goods, works or services to the same government institution, which in total over a two (2) year period exceeds US\$10 million.
- 1.2 The NIP obligation applicable to suppliers in respect of sub-paragraphs 1.1 (a) to 1.1 (c) above will amount to 30 % of the imported content whilst suppliers in respect of paragraph 1.1 (d) shall incur 30% of the total NIP obligation on a *pro-rata* basis.
- 1.3 To satisfy the NIP obligation, the DTI would negotiate and conclude agreements such as investments, joint ventures, sub-contracting, licensee production, export promotion, sourcing arrangements and research and development (R&D) with partners or suppliers.

- 1.4 A period of seven years has been identified as the time frame within which to discharge the obligation.

2 REQUIREMENTS OF THE DEPARTMENT OF TRADE AND INDUSTRY

- 2.1 In order to ensure effective implementation of the programme, successful bidders (contractors) are required to, immediately after the award of a contract that is in excess of **R10 million** (ten million Rands), submit details of such a contract to the DTI for reporting purposes.

- 2.2 The purpose for reporting details of contracts in excess of the amount of R10 million (ten million Rands) is to cater for multiple contracts for the same goods, works or services; renewable contracts and multiple suppliers for the same goods, works or services under the same contract as provided for in paragraphs 1.1.(b) to 1.1. (d) above.

3 BID SUBMISSION AND CONTRACT REPORTING REQUIREMENTS OF BIDDERS AND SUCCESSFUL BIDDERS (CONTRACTORS)

- 3.1 Bidders are required to sign and submit this Standard Bidding Document (SBD 5) together with the bid on the closing date and time.

- 3.2 In order to accommodate multiple contracts for the same goods, works or services; renewable contracts and multiple suppliers for the same goods, works or services under the same contract as indicated in sub-paragraphs 1.1 (b) to 1.1 (d) above and to enable the DTI in determining the NIP obligation, successful bidders (contractors) are required, immediately after being officially notified about any successful bid with a value in excess of R10 million (ten million Rands), to contact and furnish the DTI with the following information:

- Bid / contract number.
- Description of the goods, works or services.
- Date on which the contract was accepted.
- Name, address and contact details of the government institution.
- Value of the contract.
- Imported content of the contract, if possible.

- 3.3 The information required in paragraph 3.2 above must be sent to the Department of Trade and Industry, Private Bag X 84, Pretoria, 0001 for the attention of Mr Elias Malapane within five (5) working days after award of the contract. Mr Malapane may be contacted on telephone (012) 394 1401, facsimile (012) 394 2401 or e-mail at Elias@thedti.gov.za for further details about the programme.

4 PROCESS TO SATISFY THE NIP OBLIGATION

- 4.1 Once the successful bidder (contractor) has made contact with and furnished the DTI with the information required, the following steps will be followed:
- a. the contractor and the DTI will determine the NIP obligation;
 - b. the contractor and the DTI will sign the NIP obligation agreement;

- c. the contractor will submit a performance guarantee to the DTI;
- d. the contractor will submit a business concept for consideration and approval by the DTI;
- e. upon approval of the business concept by the DTI, the contractor will submit detailed business plans outlining the business concepts;
- f. the contractor will implement the business plans; and
- g. the contractor will submit bi-annual progress reports on approved plans to the DTI.

4.2 The NIP obligation agreement is between the DTI and the successful bidder (contractor) and, therefore, does not involve the purchasing institution.

CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.

- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.

- 3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
 - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
 - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.

- 4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

- 5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

CERTIFICATE OF INDEPENDENT BID DETERMINATION

TERMS OF REFERENCE FOR THE APPOINTMENT OF A SERVICE PROVIDER(S), FIRM OR A CONSORTIUM TO DEVELOP A LAND USE SCHEME FOR A PERIOD OF NINE (9) MONTHS FOR JB MARKS AND CITY OF MATLOSANA MUNICIPALITIES IN NORTH WEST PROVINCES

1 INTRODUCTION

- 1.1 The Department of Rural Development and Land Reform (DRDLR) requires the services of a firm or a consortium of suitably qualified firms for the development of Land Use Schemes (LUS) for various municipalities across different provinces.
- 1.2 Section 24 of the Spatial Planning and Land Use Management Act, Act No 16 of 2013 (SPLUMA)-requires that a Municipality, must after public consultation, adopt and approve a single land use scheme for its entire area within 5 years from the commencement (1st July 2015) of the Act.
- 1.3 The DRDLR has since developed 2017 land use scheme guidelines to guide municipalities in the process for the development of land use scheme as per the requirements of the SPLUMA. After continuous monitoring compliance by municipalities regarding the requirement of the SPLUMA, the department further developed a model LUS for municipalities to customise.

2. PROBLEM STATEMENT

- 2.1 Land Use Management Systems in South Africa and in particular Land use schemes have for decades brought callous challenges disempowering municipalities to adequately deal with effective land use management with serious impacts on management and regularization of land use activities.
- 2.2 Currently, there are municipalities whom within their individual areas of jurisdiction use multiple land use / town planning schemes to manage and regulate development.
- 2.3 Majority of municipalities within mostly rural provinces, such as Eastern cape, Northern cape and Limpopo and North-West Province have old town planning schemes that are biased towards established/urban areas and thus not a wall to wall land use management system. The current zoning schemes are the vestiges of the past racially based land use planning. The existing zoning schemes do not, therefore, reflect the intent and concerns of recent national land use related legislation, namely; Spatial Planning and Land Use Act, 2013, National Environmental Management Act, 1998 (Act 107 of 1998) and the 2010 NEMA Regulations, amongst others.
- 2.4 Even though the department has developed Land Use Scheme Guidelines to aid the municipalities and consultants alike in developing the schemes, the department acknowledges that there are capacity challenges within municipalities to implement SPLUMA, there are a number of municipalities without Land Use Schemes and also without both human and financial resource to prepare their own Land use scheme, therefore this initiative will go a long way in assisting these municipalities mostly those with limited and no capacity to develop their Land Use Schemes.

2.5 These Town Planning Schemes are fragmented and neglected to address land use management within rural and informal areas. These municipalities are not immune from dysfunctional planning system. The geographical areas are predominantly rural including considerable land under the traditional authorities. Majority of the population lives in a rural or peri-urban environment, which for most part is unplanned and poorly serviced.

2.6 There is a need amalgamate existing town planning schemes to reflect the current law and policy environment. The nature of land use schemes challenges faced by municipalities need to be assessed to enable identification of suitable instruments to tackle these issues.

3. PURPOSE AND OBJECTIVE OF THE PROJECT

3.1 The objective of this project is to assist those various Municipalities to develop a simplified and yet comprehensive single land use scheme to ensure the orderly and harmonious development of the municipal area without sacrificing the natural environment.

3.2 To develop LUSs that will give effect to and be consistent with the municipal SDFs and determine the use and development of land within the municipal areas to promote economic growth, social inclusion, and efficient development and to minimize the impact on public health and natural resources.

3.3 In terms of Section 24 of SPLUMA the content of a LUS must:

- Include suitable categories of land use zoning and regulations for the entire municipal area, including areas not previously subject to a land use scheme;
- Take cognisance of any environmental management instrument adopted by the relevant environmental management authority, and must comply with environmental legislation;

- Include provisions that permit the incremental introduction of land use management and regulation in areas under traditional leadership, rural areas, informal settlements, slums and areas not previously subject to a land use scheme;
- Include provisions to promote the inclusion of affordable housing in residential land development;
- Include land use and development incentives to promote the effective implementation of the spatial development framework and other development policies;
- Include land use and development provisions specifically to promote the effective implementation of national and provincial policies; and
- Give effect to municipal spatial development frameworks and integrated development plans.
- A land use scheme may include provisions relating to:
 - The use and development of land only with the written consent of the municipality;
 - Specific requirement regarding any special zones identified to address the development priorities of the municipality; and
 - The variation of conditions of a land use scheme other than a variation which may materially alter or affect conditions relating to the use, size and scale of buildings and the intensity or density of land use.

3.4. The LUSs must include but not limited to the following components:

- Scheme regulations setting out the procedures and conditions relating to the use and development of land in any zone;
- A map indicating the zoning of the municipal area into land use zones; and
- A register of all amendments to such land use scheme.

3.5. The proposed LUSs must give effect to the development principles as stipulated in Section 7 of SPLUMA: -

- (i). Spatial Justice;

- (ii). Spatial Sustainability;
- (iii). Efficiency;
- (iv). Spatial Resilience; and
- (v). Good Administration.

3.6. Given the land use management challenges facing municipalities, the following are critical components of a land use management system:

- Legislation, Land Use Policy and Guidelines;
- Integrated Zoning Scheme and Regulations;
- Zoning Maps;
- Assessment and Approval Procedures and Application Forms;
- Conditions of Approval;
- Zoning Register;
- Delegation of Decision-Making (including those relating to removal title deed restrictions);
- Development Incentives;
- Enabling Legislation;
- Reference Manual

3.7. The Land Use Schemes must take cognisance and adhere to national and provincial policies and legislation (particularly chapters 5 & 6 of SPLUMA 2013), including, but not limited to the municipal by-law, municipal Spatial Development Framework and Comprehensive 2017 Land Use Scheme Guidelines as published by the department.

4. PROJECT OUTCOMES AND SCOPE

4.1 The land use scheme to be developed should contain amongst other at least the following:

- i. Categories of land use zoning and regulation for the entire municipal area (scheme clauses and associated maps)
- ii. Provides mechanisms to promote affordable housing and other government housing schemes.
- iii. Provides mechanisms to provide incentives in strategically identified areas to promote economic and spatial justice as principles contained in the municipal spatial development framework.
- iv. Provides systems to deal with managing and regulating both formalities and informalities found within a municipal area.
- v. Transitional measures where necessary to ensure that a municipal land use scheme incorporate all land uses that duly exist and provide mechanism to migrate such land uses and associated rights to the new developed wall to wall scheme.
- vi. Provides mechanisms to link land use rights to the municipal evaluation system and other applicable system that constitute complete land use management system.
- vii. Be consistent with spatial development framework.
- viii. Process of adoption, review and monitoring of land use scheme
- ix. Processes relating to land use scheme enforcement

4.2 The Land Use Scheme adopted and approved in terms of Section 24 of SPLUMA must include at least the following:

- i. Scheme Regulations setting out the procedures and conditions relating to the use and development of land in any zone
- ii. Content of land use scheme
- iii. General Administrative, Powers and Legal effect of the Land Use Scheme
- iv. Maps indicating the zoning of the municipal areas into land use zones;
and
- v. A register of all amendments to such a land use scheme

5. PROJECT DELIVERABLE

5.1 The service provider will develop a comprehensive Inception Report indicating project milestones and deliverables, processes and procedures for LUS development, content of LUS, Legal effect of LUS etc.

5.2 The service provider would be expected to submit a final consolidated report consisting of the following:

- LUS document including zoning register, maps, tables and graphics in hard copy and electronic copy in MS Word template.
- All maps contained in LUS textual document as electronic image files (JPEG, windows Bitmap, GIF, etc.).
- All Zoning information used to generate the LUS maps in shapefile format with metadata together with correct and descriptive attribute information as what each LUS construct represents.
- The LUSs must clearly be aligned with SPUMA and North West Spatial Development Framework

5.3 The following tasks are required (per LUS):

- Assess relevance and implication of existing legislation and proposed policies and guidelines. Once the draft policy directives are in place as derived from municipality’s SDFs and other strategy interventions/completed studies, the following tasks are envisaged:

List of Activities	
1	Legislation, Land Use Policy and Guidelines:
1.1	Assess relevance and implication of existing legislation, Spatial Planning and Land use management Act 16 of 2013, Provincial and Municipal SDF, land use scheme guidelines, Model land use scheme and any other policy.
1.2	Synthesis and incorporate new policy emerging from the SDF / strategies / IDPs as well as the implications thereof for the Integrated Zoning Scheme and Regulations. Policy gaps should be identified and a brief for these should be prepared for further work.

	Integration of relevant legislation (NEMA, NHRA, Removal of Restrictions Act, etc.)
2	Integrated Zoning and Regulations:
2.1	Compile land use plan in consistence with legislation and guideline
2.2	The policies emanating from the SDFs should guide and inform the preparation of the LUS.
2.3	Evaluate LUS in terms of its flexibility and pro-activeness regarding on-going development applications and technology.
2.4	Evaluate appropriateness of the various LUS definitions
2.5	Generate extensive graphical illustrations and perhaps tables.
2.6	Draft Document
3	Zoning Maps
3.1	Assess and evaluate comparative zones for the different areas. Aspects to be addressed include reaching agreement on notation, techniques and overlays and refinement of the zoning maps
3.2	Digitise maps, preferable in GIS and link to database

	Identify mechanisms on how to promote appropriate development and

	proactively facilitate development process in targeted areas. This should be in terms of the municipality's SDF, LED and other relevant strategies.
