TERMS OF REFERENCE FOR ENLISTMENT OF A PANEL OF SERVICE PROVIDERS TO CONDUCT STRATEGIC ENVIRONMENTAL ASSESSMENT BY COMPILING ENVIRONMENTAL MANAGEMENT FRAMEWORKS AND ANY OTHER STRATEGIC INTEGRATED ENVIRONMENTAL MANAGEMENT INSTRUMENT SUCH AS ENVIRONMENTAL MANAGEMENT PLANS/ PROGRAMME, CONSOLIDATED ENVIRONMENTAL IMPLEMENTATION AND MANAGEMENT PLAN AND SPATIAL TOOLS OVER THE PERIOD OF THREE (3) YEARS

1. PURPOSE

The Department of Agriculture, Land Reform and Rural Development (DALRRD) seeks to appoint a panel of service providers to conduct Environmental Management Frameworks and any other strategic integrated environmental management instrument such as Environmental Management Plans/ Programme, Consolidates Environmental Implementation and Management Plan and spatial tools over the period of three (3) years.

2. BACKGROUND

- 2.1. The Department of Agriculture, Land Reform and Rural Development (DALRRD) is obliged in terms of the Constitution of the Republic of South Africa, the National Environmental Management Act No 107 of 1998 (NEMA), the Spatial Planning and Land Use Management Act 16 of 2013 (SPLUMA) and other environmentally related legislation to comply and integrate environmental planning on its development projects.
- 2.2. The Department is listed under Schedules 1 and 2 of the National Environmental Management Act (NEMA) No 107 of 1998, hence it is required to prepare and implement a Consolidated Environmental Implementation and Management Plan

(CEIMP), in accordance with Chapter 3 of the Act. NEMA provides for certain contents and procedures that should be covered by the CEIMP. Amongst other issues, it requires the Department to work closely with other national departments such as the Department of Forestry, Fisheries and the Environment (DFFE) to ensure compliance with their legislation in the spirit of intergovernmental relations and coordination. A Memorandum of Agreement (MoA) between departments may be entered into in carrying out the provision of legislation administered by various organs of state.

- 2.3. It is against this backdrop that the Department has developed an Environmental Policy to direct how cooperation with relevant departments may be achieved especially when it relates to the compilation and implementation of the Consolidated Environmental Implementation and Management Plan (CEIMP) in line with Chapter 3 of NEMA, Climate Change Adaptation Framework, Environmental Impact Assessment (EIA) and Strategic Assessment of the Environmental for certain Strategically Located Parcels of Land as well as in finding a collaborative mechanism for ensuring streamlined authorisations with regards to water, agriculture, mining, land development and environmental legislation and any other legislation, norms and standards.

3. SYNOPTIC OVERVIEW OF THE DALRRD'S ENVIRONMENTAL POLICY

3.1. Rationale for the establishment of the policy

- 3.1.1. The DALRRD's Environmental Policy is a thoughtful system to guide decisions and achieve rational outcomes regarding environmental compliance and management. It is intended to help determine the course of action that the Department should take in certain situations.

- 3.1.2. Without this Environmental Policy, the Department had experienced a number of challenges in fulfilling its legal mandates in terms of environmental management, which are summarized as follows:
- 3.1.2.1. There was no domestication of various environmental legislative provisions that implicate the Department.
 - 3.1.2.2. The Department comprises a wide range of programmes with specific mandates however there has been no institutional arrangement to effectively mainstream departmental environmental obligations into day-to-day operations across its approval structures and staff.
 - 3.1.2.3. The previous environmental policy was not designed to strategically address all environmental challenges that are inherent with the departmental mandate, e.g. it solely relied on the use of a single environmental management instruments to achieve compliance without necessarily looking at the quantities and complexities of compliance requirements vis-à-vis the inherent pressure or demand of project implementation environment.
 - 3.1.2.4. Before the advent of the Departmental Environmental Policy, the process for planning of projects did not enable intergovernmental cooperation and integration.
 - 3.1.2.5. The set up for internal environmental governance before the Environmental Policy compiled was silent insofar as issues of climate change are concerned.
 - 3.1.2.6. Due to the absence of an approved Environmental Policy and its implementation thereof, there was a limited awareness regarding environmental governance and management within the Department.
 - 3.1.2.7. There was limited alignment and integration of departmental projects with local level plans such as the Rural Development Plans (RDP), Integrated Development Plans (IDPs) and Spatial Development Frameworks (SDFs).
 - 3.1.2.8. There was limited monitoring and evaluation of environmental compliance within the Department. This situation made it difficult to ascertain the extent of

challenges on the ground and appropriate response measures to strengthen environmental management.

3.2. Environmental Legislative Framework

3.2.1. The Environmental Policy is based on the conceptual and legislative framework detailed below:

3.2.1.1. The National Government of South Africa has developed various policies, legislation and made various international commitments in response to the

challenges of environmental management. As reflected in NEMA, the National Framework for Sustainable Development and Action Plan for 2011-2014 (NSSD1) and National Development Plan (NDP), **'Sustainable Development'** means the integration of social, economic and environmental factors into planning, implementation and decision-making to ensure that development serves the present and future generations. It should be noted that the use of the term **'Environment'** in the policy is aligned to this broad understanding as per the Integrated Environmental Management (IEM) Guidelines.

3.2.1.2. The NEMA definition of **"environment"** is in accordance with the international understanding of sustainable development, which involves ensuring that the balancing of needs and developmental objectives of the country are achievable, with decision-making based on norms and standards aimed at attaining defensible outcomes. Sustainable development also forms the basis of global and national imperatives, including **climate change, water, green economy, and biodiversity protection which should underpin socio-economic growth**. For these requirements to be achieved, cooperative governance and alignment of policies across government institutions are essential.

3.2.1.3. South Africa is committed to a path of sustainable development, which is demonstrated by the following key environmental legislation:

- The Constitution of South Africa, 1996 (Act No. 108 of 1996);
- The National Environmental Management Act (No. 107 of 1998) (NEMA);
- National Environmental Management: Air Quality Act (No. 39 of 2004);
- National Environmental Management: Biodiversity Act (No. 10 of 2004);
- National Environmental Management Protected Area Act (No. 57 of 2000);
- National Environmental Management: Waste Act (No. 59 of 2008);
- Spatial Planning and Land Use Management Act (Act 16 of 2013) (SPLUMA);
- National Water Act (Act 36 of 1998) and related norms and standard;
- Subdivision of Agricultural Land Act, 1970 (Act No. 10 of 1970) and several related agricultural legislation
- Mineral and Petroleum Resources Development Act (Act 28 of 2002) (MPRDA);
- National Environmental Management: Environmental Impact Assessment Regulations (NEMA Environmental Impact Assessment (EIA) Regulations);
- National Environmental Management: Integrated Coastal Management Act (No. 24 of 2008)(NEM:ICMA);
- National Climate Change Response Policy (2011);
- World Heritage Convention Act (No. 49 of 1999);
- Mountain Catchment Areas Act (No. 63 of 1970);
- National Forests Act No. 84 of 1998 (NFA); and
- Municipal By-Laws.

- DFFE Instruments Regulations
- Draft Minimum environmental information standards for SDFs
- EMFSs for the 3 District Municipalities as well as their Exclusion standards
- Guidelines for Climate Change Considerations in EIAs, Waste Licence and Air Emission Licence

3.3. The Environmental vision of the Department.

3.3.1. The environmental vision of the Department is to achieve a balanced development that demonstrate socially, economically and environmentally sustainable.

3.3.2. This Vision outlines the Department's commitment to:

- 3.3.2.1. Act in accordance with all applicable environmental legislation;
- 3.3.2.2. Implement its mandate in accordance with good environmental management practices;
- 3.3.2.3. Promote capacity building and technical support within the Department and for relevant project beneficiaries, to achieve this vision, and
- 3.3.2.4. Deliver on its core mandates in the most efficient and effective manner possible.

3.4. Objectives of this Environmental Policy

3.4.1. The objectives of the Environmental Policy sets out the Department's responsibilities regarding environmental legal obligations and good practice approaches, and are as follows:

- 3.4.1.1. Set out a governance framework that includes the environmental coordination mechanism;

- 3.4.1.2. To affirm the Consolidated Environmental Implementation and Management Plan (CEIMP) as provided for by NEMA at the centre of intergovernmental and Intra-departmental environmental cooperative governance;
- 3.4.1.3. To promote a principle led project planning and decision making;
- 3.4.1.4. To strengthen project planning through environmental screening processes, climate change risk and vulnerability Assessment, and strategic environmental Assessment of RDPs as well as any recognised Integrated Environmental Instrument;
- 3.4.1.5. Conduct continuous training and capacity building; and
- 3.4.1.6. Provide for a monitoring and evaluation framework.

3.5. Policy measures

3.5.1. To address the Department's current challenges in meeting its environmental obligations, it was necessary for the DALRRD to adopt and implement a number of policy measures aimed at strengthening institutional arrangements for environmental management, build inter- and intra-governmental relations, apply tools to build capacity and awareness of environmental obligations, and promote integrated planning of projects.

3.5.2. A number of policy measures are set out as follows:

a) Strengthen Internal Environmental Coordination

Environmental Compliance and Implementation Forum (ECIF) is established by this policy to coordinate all environmental activities of the Department including the effort to coordinate how environmental compliance is to be attained through cooperation with other Organs of State.

b) Ensure proper Environmental Cooperative Governance

The DALRRD is listed under Schedules 1 and 2 of NEMA as having a mandate that can both affect and promote environmental management. The Environmental Policy places the Consolidated Environmental Implementation and Management Plan (CEIMP) that is compiled in accordance with Section 11 of NEMA at the centre of environmental compliance and management within and outside the Department.

c) Strengthen Project Planning

i. Strategic Assessment of the Environment

The Strategic Environmental Assessment (SEAs) is the mapping of sensitivity and opportunity of parcels of land against the backdrop of certain priority commodities. SEAs will be compiled for certain Strategically Located Lands (SLLs) juxtaposing identified sensitivities and opportunities with various key commodities identified by various development plans, e.g. Rural Development Plans (RDPs). It is expected that after compilation of SEAs, the Department will work with the Department of Forestry, Fisheries, and the Environment (DFFE) to find ways of streamlining environmental requirements.

- ii. Intergovernmental coordination and cooperation with regard to authorization
- Collaboration will be undertaken in accordance with the Guidelines for the Implementation of EIA Regulations in effecting Section 24J of NEMA, which provides that any Organ of State (OoS) may approach the DFFE to work together in finding a collaborative mechanism for dealing with environmental impact of their projects. It is most applicable to Organs of State (OoS) that undertake massive infrastructure projects of national importance, e.g. energy projects by Eskom, rail or harbours projects by Transnet, etc. The DALRRD also have projects that are important for the transformation of the country's socioeconomic status, especially that of the rural areas.

- iii. Integration of Climate Change Risks and Vulnerability Assessment (RVA) and Local Climate Change Plan for all relevant developmental plans of the Department and its partners.

Integration of Climate Change Risk and Vulnerability Assessment (RVA) and Local Climate Change Adaptation Plans detailing adaptation options for Rural Development Plans (RDPs) and Integrated Development Plan (IDP) will be conducted. This is in line with the National Climate Change Response Policy

as well as the Climate Change Adaptation Plan for Rural Human Settlement. Local adaptation plans will assist practitioners to develop long-term risk management strategies to cope with climate change. Incorporating adaptation plans into IDPs will mainstream adaptation issues into municipal planning and decision making. Continuous training of rural development planners at all levels on this aspect is a cornerstone for the implementation of this environmental policy.

- iv. Environmental Screening Tool as a key component of the Departmental Environmental Impact Management processes.

An Excel-based Environmental Screening Tool will be rolled out to DALRRD staff to assist in identify environmental legal requirements as well as best practice of certain proposed projects at various scales. The Department should use the Environmental Screening Tool to determine its environmental legal requirements on a project-by-project basis.

- v. Build capacity and awareness

DALRRD will roll-out annual training on the Environmental Policy and the Environmental Screening Tool to staff in all Provincial Shared Services Centres (PSSCs). It is also anticipated that continuous training on the Climate

Change Adaptation Plan for Rural Human Settlement will be rolled-out in perpetuity for the benefit of all stakeholders participating in the rural development sector in the country

d) Integration of Environmental Planning into Spatial Planning Processes

The Spatial Planning and Land Use Management Act (SPLUMA) No 16 of 2013 requires government's spatial planning policy, programmes and plans to incorporate environmental planning considerations in their compilation and implementation. It is against that background that in implementing SPLUMA certain projects should be about the streamlining of environmental planning tools into the heart of spatial planning policy landscape.

3.6. Implementation of the Environmental Policy

The cornerstone for the implementation of this policy will be centred on the compilation, implementation and integration of SEAs, EIAs, Climate Change Risk and Vulnerability Assessment (RVA), Local Climate Change Adaptation Plans and roll out of training for the above. Certain SPLUMA implementation projects with a strong environmental bias will be implemented in the context of this policy. The smooth running of structures established in line with this policy (e.g. ECIF) will be central to ensuring successful coordination of the above activities.

4. OBJECTIVES OF THE PROJECT

The objective is to call for proposals from suitably qualified professional service providers to be enlisted in the panel of service providers to be contracted on an as and when required basis to assist the DALRRD with projects related to the implementation of its environmental policy for the period of thirty-six (36) months. NB: It must be noted that
