THE NATIONAL INDUSTRIAL PARTICIPATION PROGRAMME

INTRODUCTION

The National Industrial Participation (NIP) Programme, which is applicable to all government procurement contracts that have an imported content, became effective on the 1 September 1996. The NIP policy and guidelines were fully endorsed by Cabinet on 30 April 1997. In terms of the Cabinet decision, all state and parastatal purchases / lease contracts (for goods, works and services) entered into after this date, are subject to the NIP requirements. NIP is obligatory and therefore must be complied with. The Industrial Participation Secretariat (IPS) of the Department of Trade and Industry (DTI) is charged with the responsibility of administering the programme.

1 PILLARS OF THE PROGRAMME

- 1.1 The NIP obligation is benchmarked on the imported content of the contract. Any contract having an imported content equal to or exceeding US\$ 10 million or other currency equivalent to US\$ 10 million will have a NIP obligation. This threshold of US\$ 10 million can be reached as follows:
 - (a) Any single contract with imported content exceeding US\$10 million.

or

(b) Multiple contracts for the same goods, works or services each with imported content exceeding US\$3 million awarded to one seller over a 2 year period which in total exceeds US\$10 million.

or

(c) A contract with a renewable option clause, where should the option be exercised the total value of the imported content will exceed US\$10 million.

or

- (d) Multiple suppliers of the same goods, works or services under the same contract, where the value of the imported content of each allocation is equal to or exceeds US\$ 3 million worth of goods, works or services to the same government institution, which in total over a two (2) year period exceeds US\$10 million.
- 1.2 The NIP obligation applicable to suppliers in respect of sub-paragraphs 1.1 (a) to 1.1 (c) above will amount to 30 % of the imported content whilst suppliers in respect of paragraph 1.1 (d) shall incur 30% of the total NIP obligation on a *pro-rata* basis.
- 1.3 To satisfy the NIP obligation, the DTI would negotiate and conclude agreements such as investments, joint ventures, sub-contracting, licensee production, export promotion, sourcing arrangements and research and development (R&D) with partners or suppliers.

1.4 A period of seven years has been identified as the time frame within which to discharge the obligation.

2 REQUIREMENTS OF THE DEPARTMENT OF TRADE AND INDUSTRY

- 2.1 In order to ensure effective implementation of the programme, successful bidders (contractors) are required to, immediately after the award of a contract that is in excess of **R10 million** (ten million Rands), submit details of such a contract to the DTI for reporting purposes.
- 2.2 The purpose for reporting details of contracts in excess of the amount of R10 million (ten million Rands) is to cater for multiple contracts for the same goods, works or services; renewable contracts and multiple suppliers for the same goods, works or services under the same contract as provided for in paragraphs 1.1.(b) to 1.1. (d) above.

3 BID SUBMISSION AND CONTRACT REPORTING REQUIREMENTS OF BIDDERS AND SUCCESSFUL BIDDERS (CONTRACTORS)

- 3.1 Bidders are required to sign and submit this Standard Bidding Document (SBD 5) together with the bid on the closing date and time.
- In order to accommodate multiple contracts for the same goods, works or services; renewable contracts and multiple suppliers for the same goods, works or services under the same contract as indicated in sub-paragraphs 1.1 (b) to 1.1 (d) above and to enable the DTI in determining the NIP obligation, successful bidders (contractors) are required, immediately after being officially notified about any successful bid with a value in excess of R10 million (ten million Rands), to contact and furnish the DTI with the following information:
 - Bid / contract number.
 - Description of the goods, works or services.
 - Date on which the contract was accepted.
 - Name, address and contact details of the government institution.
 - · Value of the contract.
 - Imported content of the contract, if possible.
- The information required in paragraph 3.2 above must be sent to the Department of Trade and Industry, Private Bag X 84, Pretoria, 0001 for the attention of Mr Elias Malapane within five (5) working days after award of the contract. Mr Malapane may be contacted on telephone (012) 394 1401, facsimile (012) 394 2401 or e-mail at Elias@thedti.gov.za for further details about the programme.

4 PROCESS TO SATISFY THE NIP OBLIGATION

- 4.1 Once the successful bidder (contractor) has made contact with and furnished the DTI with the information required, the following steps will be followed:
 - a. the contractor and the DTI will determine the NIP obligation;
 - b. the contractor and the DTI will sign the NIP obligation agreement;

- c. the contractor will submit a performance guarantee to the DTI;
- d. the contractor will submit a business concept for consideration and approval by the DTI;
- e. upon approval of the business concept by the DTI, the contractor will submit detailed business plans outlining the business concepts;
- f. the contractor will implement the business plans; and
- g. the contractor will submit bi-annual progress reports on approved plans to the DTI.
- 4.2 The NIP obligation agreement is between the DTI and the successful bidder (contractor) and, therefore, does not involve the purchasing institution.

CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.
- Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe* se prohibition meaning that it cannot be justified under any grounds.
- 3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
 - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
 - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

CHIEF DIRECTORATE: SPATIAL DEVELOPMENT PLANNING

Private Bag X 833, PRETORIA, 0001; Capitol Towers, 224, Helen Joseph Street, Pretoria, 0001; Tel: 012 312 8155; Fax: 012 323

TERMS OF REFERENCE FOR THE APPOINTMENT OF A SERVICE PROVIDER TO DEVELOP THE VAAL RIVER REGIONAL SPATIAL DEVELOPMENT FRAMEWORK WITHIN A PERIOD OF EIGHTEEN (18) MONTHS.

1. INTRODUCTION

1.1 The Department of Rural Development and Land Reform (DRDLR) requests the services of a multi-disciplinary team to develop a Vaal River Regional Spatial Development Framework within a period of eighteen (18) months.

2. PROBLEM STATEMENT

- 2.1 The area around the Vaal River inherently fosters potential for building an economically improved efficient and socially equitable area. The area is fortunate to not only have the Vaal River as a potential anchor for economic stimuli but also the Vaal Dam, Vredefort Dome, Parys, Petro-Chemical developments in Sasolburg, iron and steel industry (ArcelorMittal) in Vereeniging (although declining), tourism and tourism attractions, agriculture and agro-processing activities, established tertiary institutions such as the Vaal University of Technology and North West University as the custodians of Innovation and Technology in the Region and significant rail, road and pipeline infrastructure as supplementary anchors in the area. Notwithstanding these anchors it is abundantly clear that development in the functional area next to the Vaal River is neither balanced nor complementary of each other on either side of the provinces of Free State, North West, Mpumalanga or Gauteng. development is mostly located on the Gauteng side of the river with contrasting extensive vacant land on the Free State. North West and Mpumalanga side of the river.
- 2.2 The current state of unbalanced development in this area is a symptom of our fondness for administrative geography, based on provincial and local government boundaries and jurisdictional demarcations that do not easily relate to how areas

actually function across administrative boundaries. Both provincial and local government plans and frameworks have been developed in isolation; without any due consideration of circumstances that prevail "across jurisdictional borders". This not only leads to a misunderstanding of the comparative and competitive advantages of the area and how people and capital flows shape the area, but also negatively impacts on reaching the development potential of the area.

- 2.3 The Vaal River Complex Regional Structure Plan, 1996 (formally known as the Vaal River Complex Guide Plan, 1982) for many years served as the only overarching instrument to guide development and future planning near the banks of the Vaal River and its tributaries. The Vaal River Complex Regional Structure Plan was the only planning related instrument that covered both sides of the Vaal River regardless of provincial and municipal boundaries. With the repeal of the Physical Planning Act, 1967, the Vaal River Complex Regional Structure Plan lost its legislative sponsorship and therefore cannot be implemented anymore. The proposed Vaal River Regional Spatial Development Framework will serve as an overarching instrument to guide development and planning in the absence of the Vaal River Complex Regional Structure Plan across provincial and municipal boundaries.
- 2.4 The uncoordinated manner in which the Vaal River area is developing brings about some socio-economic challenges to the already struggling surrounding areas of Sedibeng, Fezile Dabi, Dr Kenneth Kaunda and Gert Sibande District Municipalities. These municipalities experience similar challenges which relate to:
 - a) Rising in unemployment and poverty levels;
 - b) Threat of pollution of the Vaal River System by industries;
 - c) Spatial fragmentation that contributed to social divisions;
 - d) Lack of efficient public transport and access routes that limit movement of goods and services; and
 - e) Limited infrastructure capacity that is impeding development i.e. Waste Water Treatment and Sanitation.

The above mentioned challenges have consequently resulted in high crime rates and community protests. Existing development limits public access to the Vaal River and prevents the public from appreciating this natural asset by mostly privatising the river front. This also impedes on the type of land use along the river by mostly confining it to exclusive residential developments.

- 2.5 Although agricultural activities exist in the area they have not been fully exploited to benefit the area. Initiatives like the proposed agri-parks and Rural Development Plans will inject much needed investment into the area and provide much needed opportunities for emerging farmers that are currently lacking.
- 2.6 Due to the inward focus of Municipal Spatial Development Frameworks, strategies and land use planning the economic transformation and integration of functional areas (that stretch wider than jurisdictional boundaries) is not sufficiently prioritised. This is exploited by private economic initiatives ignoring spatial planning guidance in pursuit of bigger profit margins that are not advantageous to the spatial development of the broader functional area.

3. BACKGROUND

- 3.1 The Spatial Planning and Land Use Management Act, 2013 (Act 16 of 2013), (SPLUMA) puts forward development principles, norms and standards for spatial planning and land use management. It further provides for the preparation of spatial development frameworks by all three tiers of government and to ensure adherence by stating in section 12 that national government, provincial government and municipalities must participate in spatial planning and land use management processes that impact on each other to ensure that plans and programmes are coordinated.
- 3.2 SPLUMA further unpacks the preparation and content of National, Provincial, Regional and Municipal Spatial Development Frameworks in sections 13 to 21 with sections 18 and 19 specifically dealing with Regional Spatial Development Frameworks (RSDF). From section 12(3) it is clear that the Regional Spatial Development Framework feeds into the National Spatial Development Framework and therefore should address aspects of national interest.
- 3.3 The Draft National Spatial Development Framework already acknowledges the Vaal River Regional Spatial Development Framework as a RSDF in process of development.

- 3.4 Preceding the development of this terms of reference a Feasibility Study to determine the feasibility of formulating the Vaal River RSDF was undertaken. The feasibility study determined that there is sufficient adherence to prescribed requirements to recommend that the Vaal River RSDF be formulated.
- 3.5 In light of above, the Department of Rural Development and Land Reform (DRDLR) decided to request the services of a multi-disciplinary team to develop the Vaal River Regional Spatial Development Framework.

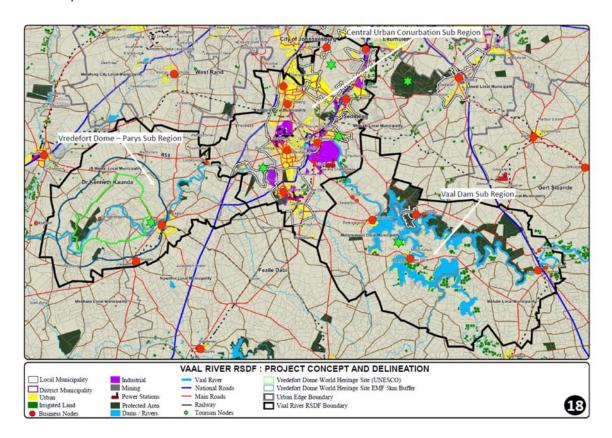

4. OBJECTIVES

- 4.2 The main objective of the project is to develop the Vaal River Regional Spatial Development Framework that will present a common spatial development vision for the area and will guide planning and development decisions across all sectors of government. The Regional Spatial Development Framework must:
 - i. Provide a common spatial vision to guide future development;
 - ii. Give effect to the development principles and applicable norms and standards set out in Chapter 2 of the Spatial Planning and Land Use Management Act, 2013 (Act 16 of 2013);
 - iii. Give effect to National, Provincial and Municipal policies, priorities, plans and planning legislation;
 - iv. The Vaal River RSDF will be instrumental in addressing the socio-economic issues that are faced by communities within Sedibeng and Fezile Dabi District Municipalities while also facilitating implementation of the National Development Plan (NDP) mandate which states that government needs to "deal intelligently with social exclusion, environmental threats, economic inefficiencies, logistical bottle necks, urban insecurity, decaying infrastructure and impacts of new technologies."
 - v. Reflect the current state of affairs in that area from a socio-economic spatial and land use perspective of the region;
 - vi. Indicate desired patterns of land use in the area;
 - vii. Link rural and urban economies in order to accommodate migration issues as stipulated in the National Development Plan 2030.
 - viii. Promote regional thinking in spheres of Government and sectors;
 - ix. Enhance cooperation between spheres of government;

- x. Provide basic guidelines for spatial planning, land development and land use management in the area;
- xi. Propose how the Framework is to be implemented and funded; and
- xii. Comply with environmental legislation.

5. SCOPE OF WORK

5.1. The project entails the development of the Vaal River RSDF for the region depicted in the map below.

It should thus be clear that the region as depicted in the map above includes certain areas of Gauteng, Free State, North West and Mpumalanga Provinces inclusive areas within the Dr Kenneth Kaunda, Fezile Dabi, Gert Sibande and Sedibeng District Municipalities and areas inclusive of Dipaleseng, Emfuleni, Lesedi, Mafube, Metsimahole, Midvaal, Moqhaka, Ngwathe and JB Marks Local Municipalities. It is imperative that the project area be studied, analysed and examined closely in terms of a functional area and not necessarily within the limitations of municipal and provincial boundaries.

- 5.2. The RSDF should aim to rationalise (and map where possible) aspects of Municipal, Provincial and National planning and interventions impacting the project area, including but not limited to the:
 - a. Spatial Development Frameworks of the relevant municipalities and provinces;
 - b. Strategies (including: Human Settlements, infrastructure, capital spending, and local economic development strategies etc.) of the relevant municipalities;
 - c. Existing Free State, Gauteng, North West and Mpumalanga provincial plans affecting the area including but not limited to:
 - i. Gauteng Province: Gauteng Integrated Infrastructure Master Plan (GIMP), Gauteng Integrated Transport Master Plan (GITMP), Gauteng Economic Development Plan, Gauteng Township Economy Revitalisation Strategy, Gauteng Provincial Environmental Management Framework (GPEMF) and the Gauteng Spatial Development Framework (GSDF) etc.);
 - ii. Free State Province: Provincial Spatial Development Framework, Agriculture Master Plan, Rural Development Plan, Free State Biodiversity Plan and the Vredefort Dome Environmental Management Framework Thabo Mofutsanyane Rural Development Plan;
 - iii. North West Province: National Treasury's Neighbourhood Development Programme and Urban Network Strategy; Relevant National Strategic Infrastructure Projects (SIPs) impacting on the project area; and Localised plans e.g. tourism strategies etc.
 - iv. Mpumalanga Province: Relevant National Strategic Infrastructure Projects (SIPs) impacting on the project area; and Localised plans e.g. tourism strategies etc.
- 5.3. The successful service provider will also be expected to undertake the following:
 - a. The above rationalisation forms part of the Research/Diagnostic Report.
 - b. This will be followed by a Research Analysis Report which must amongst other aspects ensure that the analysis of the space economy is undertaken at the level of the functional region. Analysis must be spatial and temporal including socioeconomic, natural environment, infrastructure and built environment aspects. Existing planning initiatives in the project area must be critically examined and rationalised with evidence from data. Economic analysis must include the economic potential of the area (including relevant industries and sectors), job creation potential and economic growth prospects.

- c. Drafting of a Spatial Vision in line with the NDP is essential. The process of developing a Spatial Vision must include conceptualisation of a Spatial Vision supplemented by a write up on how the vision should be interpreted. The Spatial Vision will be subject to consultation at the RSDF technical working group meeting and other identified fora.
- d. Scenario planning and/or benchmarking with other City Regions or river cities.
- e. Develop Spatial Options and Proposals for the development of the region taking cognisance of the following:
 - i. The outcome of the previously developed feasibility study, diagnostic and research done. This will include any further analysis of work being undertaken by government that may not have been included previously.
