CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
 - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
 - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- 4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

CERTIFICATE OF INDEPENDENT BID DETERMINATION

I, the undersigned, in submitting the accompanying bid:

do hereby make the following statements that I certify to be true and complete in every respect:

6. The bidder has arrived at the accompanying bid independently from, and without consultation, communication, agreement or arrangement with any competitor. However communication between partners in a joint venture or consortium³ will not be construed as collusive bidding.

 - (a) prices;
 - (b) geographical area where product or service will be rendered (market allocation)

9. The terms of the accompanying bid have not been, and will not be, disclosed by the bidder, directly or indirectly, to any competitor, prior to the date and time of the official bid opening or of the awarding of the contract.

³ Joint venture or Consortium means an association of persons for the purpose of combining their expertise, property, capital, efforts, skill and knowledge in an activity for the execution of a contract.

10. I am aware that, in addition and without prejudice to any other remedy provided to combat any restrictive practices related to bids and contracts, bids that are suspicious will be reported to the Competition Commission for investigation and possible imposition of administrative penalties in terms of section 59 of the Competition Act No 89 of 1998 and or may be reported to the National Prosecuting Authority (NPA) for criminal investigation and or may be restricted from conducting business with the public sector for a period not exceeding ten (10) years in terms of the Prevention and Combating of Corrupt Activities Act No 12 of 2004 or any other applicable legislation.

1. Background and introduction

In 2005, the South African Cabinet approved recommendations from the President's Office on "an implementation plan to develop a monitoring and evaluation (M&E) system". The system was to include functions such as monitoring, evaluation, early warning, data verification, data collection, and reporting (ECD Working Paper Series No: 21, July 2010). The role of M&E in the policy cycle of planning, implementation, and monitoring was established. It is in this context that a Policy Framework for Government-Wide Monitoring and Evaluation (GWM&E) was published in November 2007 (Office of the Presidency) with the aim of providing an integrated, encompassing framework of M&E principles, practices and standards to be used throughout Government, and function as an apex-level information system which draws from component systems in the framework to deliver useful M&E products for its users.

In order to ensure transparency and accountability, promote service delivery improvement, compliance with statutory and other requirements and a learning culture in the public sector; each government department and other public sector bodies has to make certain that they are able to provide the necessary information as required and should determine procedures and processes appropriate to their own operations so as to enable them to do so.

Cabinet has approved a proposal for a Government-wide Monitoring and Evaluation (M&E) System that will collect, collate, analyse, disseminate and apply information on the progress and impact of programmes in order to ensure transparency and accountability, and promote service delivery improvement, compliance with statutory and other requirements and a learning culture in the public sector. Each department or public sector body has to ensure that they are able to provide the necessary information as required and should determine procedures and processes appropriate to their own operations in order to be able to do so.

DAFF recognised the need for the development of a new performance monitoring and reporting IT system in line with GWM&E System that will deliver reliable and useful information, analysis, verification and validation of data. To also improve the monitoring and evaluation (M&E) practices and capacity contributing to enhanced information management and better decision making. This initiative is as part of DAFF's strategy to address the current challenges to increase its effectiveness in achieving its desired outcomes and strategic objectives.

This project is part of DAFF's process of refining its M&E system to improve the performance of its system of governance. It is envisioned that problems on information generation, information reliability and accuracy as well as timely reporting of information will be addressed

through the System. This M&E reporting system will help stakeholders in planning, policy and decision making and continuous improvement on organizational performance. The system will be delivered to the desktop using web technology.
