## CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Standard Bidding Document (SBD) must form part of all bids<sup>1</sup> invited.
- Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).<sup>2</sup> Collusive bidding is a pe se prohibition meaning that it cannot be justified under any grounds.
- Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
  - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
  - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

<sup>&</sup>lt;sup>1</sup> Includes price quotations, advertised competitive bids, limited bids and proposals.

<sup>&</sup>lt;sup>2</sup> Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

TERMS OF REFERENCE FOR THE APPOINTMENT OF A SERVICE PROVIDER TO REVIEW THE DISTRICT RURAL DEVELOPMENT SECTOR PLANS FOR THE HARRY GWALA AND UGU DISTRICTS, LOCATED IN THE PROVINCE OF KWAZULU-NATAL FOR A PERIOD OF NINE (9) MONTHS.

## 1. INTRODUCTION

1.1. The Department of Agriculture Land Reform and Rural Development DALRRD) requires professional services of one (1) firm or a consortium of suitably qualified professionals to review the Harry Gwala and Ugu District's, District Rural Development Sector Plans at District level located in the Province of KwaZulu-Natal.

#### 2. BACKGROUND

- 2.1. The Department of Agriculture, Land Reform and Rural Development (DALRRD) is a department which is the result of a merger between the Department of Agriculture and the Department of Rural Development and Land Reform. This provides an opportunity for the implementation of more efficient programs, policies and result driven approach to ensure greater growth in the Sector. It is mandated to champion the Agriculture, Rural Development and Land Reform Programme in the country. To achieve this, the DALRRD has come up with plans which will drive much needed growth and inclusivity in the Sector and help address the needs of people that live in extreme poverty and are subjected to underdevelopment in rural parts of the country.
- 2.2. In September 2011, the then Department of Rural Development and Land Reform (DRDLR) which is now known as Department of Agriculture, Land Reform and Rural Development (DALRRD) initiated a programme to develop Rural Development Sector Plans (RDSPs). Similar to sector Plans for Provincial Sector Departments, e.g. housing, disaster management etc, this sector plan is aimed at guiding the longer-term implementation plan of the rural development sector in all of its aspects. This includes economic development of the rural areas as well, and not only land redistribution and restitution.
- 2.3. These plans focused mainly on the people living in the most impoverished districts in South Africa. These Rural Development Sector Plans would enhance the impact of intensified government investments through reviewing of the then developmental realities and potential in those areas and come up with interventions that would bring change in the livelihoods of people in rural communities.

- 2.4. These Plans would be a priority planning tool to guide the work with Branches within the Department. This would mean that all the projects should be informed by these District Plans. For the past five years, these plans have been used by Provincial Shared Services Centre (PSSCs) for identification, monitoring, evaluating and implementing initiatives, programmes and projects by the Department in the municipalities. Components of these District plans would also be built into various Municipal Spatial Development Frameworks (SDFs) to ensure that the departmental footprint find its spatial expression as sector within the rural space. This also ensured smooth project implementation.
- 2.5. These Plans must be integrated with existing National, Provincial and Municipal plans, processes and priorities, in terms of both the content of the various plans and the various structures involved in the management and alignment of planning processes e.g., District Development Model, IDPs etc. There is a critical need for alignment between sector departments, parastatals and the municipal development agenda in ensuring integrated and sustainable development.
- 2.6. The Department deems it necessary to develop Rural Development Sector Plans that will assist in identifying opportunities of these rural spaces of South Africa to ensure that they achieve their development potential. To assist in this process the National office developed Guidelines for the development of Rural Development Sector Plans.

# 3. PROBLEM STATEMENT

- 3.1. Since the merger between the two departments, additional plans have been developed to serve as enablers and guidelines to direct the work of the DALRRD. These plans includes the Agriculture and Agro-Processing Master Plan (AAMP), Comprehensive Land and Agrarian Strategy (CLAS) and Land Use Master Plan (LUMP) for Land Reform purposes. With these new directives which addresses only certain sections of the mandate of the department, it is has become necessary that better alignment / integration between these enablers are facilitated and a more comprehensive and inclusive programme of action be developed. The new DRDSPs also needs to address the District Development Model (DDM) and the Eastern Seaboard / N2 South Corridor Smart City concept.
- 3.2. Within the Department, there is lack of coordination and integration between the work/businesses of different programmes which makes implementation, monitoring and evaluation a difficult process for those responsible for this aspect of work.
- 3.3. Rural communities are still characterised by poverty, inequality, limited access to basic social infrastructure, underdevelopment, lack of economic opportunities, fragmented spatial patterns and environmental degradation. Previously rural communities relied more on agriculture and subsistence farming for food and income/exchange benefits.
- 3.4. The rural parts of the country are still associated with high levels of poverty, poor spatial planning, lack of economic opportunities and poor access to basic services.

- 3.5. The inequality of the past is more vivid in rural areas since spatial planning had neglected these areas for quite a long time. Land use practices in these areas were in most cases done in unsustainable manner with no proper plans in place to manage and guide development to maximise improvement of livelihoods of the rural communities, as a result these areas have been left displaced, segregated, underdeveloped and impoverished.
- 3.6. Above all, these plans need to ensure transformation of rural South Africa into socially cohesive and stable communities with viable institutions, sustainable economies and universal access to social amenities

# 4. THE OBJECTIVE OF THE PROJECT

- 4.1. The main objective of the project is to formulate a comprehensive plan of action towards enhancing rural development for the Harry Gwala and Ugu Districts. Such comprehensive plan should comprise a clear set of objectives, strategies, projects, and a phased implementation programme related to rural development for the district.
- 4.2. There is a need to ensure that the Rural Development Sector Plans are aligned to other government initiatives including the National Development Plan (NDP), New Growth Path (NGP), and Industrial Policy Action Plan (IPAP) and other relevant plans. Provincially, these plans need to align but not limited to the following: Provincial Growth Development Strategy (PGDS), Provincial Spatial Development Framework (PSDF) and Provincial Rural Development Strategy (PRDS). Alignment at Local level will be based on plans like Spatial Development Framework (SDF), Precinct Plans, Integrated Development Plans (IDP), and up to local area planning and aligned to municipal local economic development (LED) institutional arrangements.
- 4.3. The plans need to feed into the District Development Model (One Plan) to ensure the sector (DALRRD) input finds expression into this Multi-Sectoral Institutional Approach which caters for inputs from various sector departments at all three spheres of government and Spatial Approach.
- 4.4. The plan also needs to take cognisance of the concept of the new "Eastern Seaboard Smart City" initiative in the Eastern Cape, which affects the two subject districts. The Rural Development Sector Plan needs to highlight what the contribution of the department towards this concept will be and not develop the Smart City itself.
- 4.5. There are various definitions of the Smart Cities, but an inclusive interpretation is contained in the SA Smart Cities Framework. This interpretation is depicted below.

#### Inclusive interpretations of the terms "smart" and "city"

#### Smart

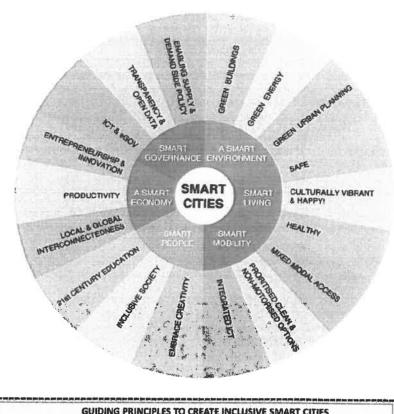

The term "smart" is generally associated with a range of technological and digital concepts and interventions, especially ICT. There also seems to be a particular focus on 4IR (Fourth Industrial Revolution) technologies.

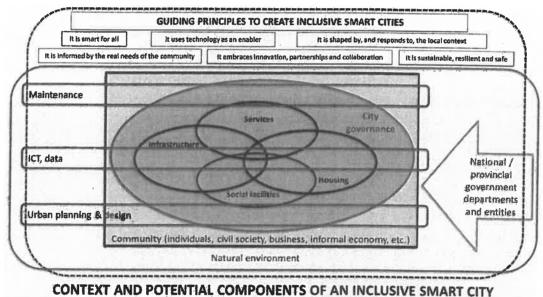

However, in addition to this technology-intensive interpretation, smart could also mean "intelligent", or "knowledge-intensive". The understanding of the term "technology" could be expanded to also include innovative approaches, techniques and processes, as well as non-conventional interventions and scientific innovation.

#### City

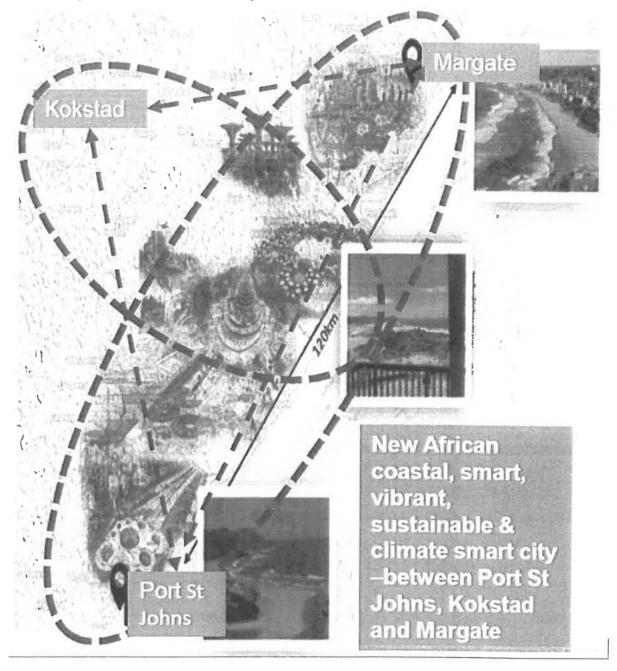

The word "city" has multiple meanings in the smart city conversation. It is a catch-all phrase that includes various types of settlements, or parts of settlements. It could refer to any of the following:

- Cities, towns and villages of any size, including those in rural locations.
- Municipalities (metropolitan, district, local).
- A custom-built greenfield development ("city") which may or may not be linked to an existing city.
- Large new precinct developments linked to an existing city (e.g. business parks).
- Upgrading or retrofitting aspects (e.g. transportation or connectivity) or parts (e.g. an educational precinct) of an existing city or town.
- New residential, commercial or mixed-use developments, such as privately developed gated communities.
- 4.6. The "Eastern Seaboard Smart City" initiative is in its very early stages but will be based on the "South African Smart Cities Framework" of which the concept and approach is shown in the figures below.

4.7. The Image below outlines the proposed area pf the New Smart City, which stretches from Margate to Port St Johns Along the coast, and inland to Kokstad.

4.8. The Rationale in terms of possible economic activities as well as possible interventions/actions are outlined in the table below.

# **Potential Economic Anchors**

- Tourism potential with cultural heritage Estal
- Oceans economy and marine industry
  - Promotion of fisheries on Eastern Seaboard for job creation & local economic development
  - Revamped port or harbour & Vessel and sea ferry production
  - Aquaculture with sardine run as tourist attraction
- Oil & Gas potential
- Agriculture incl. full value chain of hemp production
- Film and creative sector
- Air, Rail and Road transport network complemented by maritime highway.

# **Possible Actions**

- Establish Special Projects Team with ongoing technical support from our partners e.g. China, Norway and Spain
- Ensure land remains affordable, local ownership and management is prioritised
- Promote investment incentives (e.g. tax free economic zone)
- Ensure reticulation for access to ICT fibre, water & sustainable energy
- Establish specialised academic & innovation institutes (ICT, Marine, Film, Agriculture etc)
- 4.9. This multi-sectoral inputs from various provincial and/or national government departments are provided as "Sector Plan Inputs". Hence, it is recommended that the "Sector Plan Input" of the DALRRD be provided by way of a Rural Development Sector Plan.
- 5. CHARACTERISTICS OF DISTRICT RURAL DEVELOPMENT SECTOR PLANS
- 5.1. There is an envisaged characteristic that the District Rural Development Sector plan has to follow, and it is envisioned as such:
  - 5.1.1. DALRRD District Rural Development Sector Plan represents the department's operational plan and programme for the specific geographic area (Inter Governmental Relation Zone).
  - 5.1.2. The Rural Development Sector Plan is based on the mandate of the DALRRD, and is aligned to the vision and mission, as well as Strategic priorities and outcomes for the department as defined in the DALRRD Annual Performance Plan Business Plan, 2019-2024.
  - 5.1.3. The Rural Development Sector Plan will comprise of two main components: Rural Development Framework and an Implementation Plan:
    - 5.1.3.1. The Rural Development Framework being a spatial plan intended to depict the Rural Spatial Concept or Rationale for the specific district/metropolitan "IGR Impact Zone".

- 5.1.3.2. The existing Municipal Spatial Development Framework to represent the "base map" for the Rural Development Framework from which the Rural Spatial Concept for the area should be derived.
- 5.1.3.3. The Rural Spatial Concept will be supplemented with inputs from the various Programmes/Branches of the DALRRD which will be structured in line with the three key pillars of the departments' Comprehensive Rural Development Programme namely, Agrarian Transformation, Rural/infrastructure Development and Land Reform.
- 5.1.3.4. From Rural Spatial Concept/Rationale, a number of Priority Rural Intervention Areas may be demarcated to enhance future spatial targeting in the district, and/or to initiate more detailed future Community Based Planning (Rural Intervention Area/ Precinct Plans) in conjunction with the relevant local municipality.
- 5.1.3.5. The Rural Development Sector Plan to form a basis for integration of rural development issues into the planning tools of municipalities including the municipalities' IDPs, SDFs and DDMs.
- 5.2. The Implementation Plan should comprise a list of short-term and medium- to long-term projects to be implemented in the area under the various programmes of the DALRRD.
- 5.3. These projects must be geo-referenced and spatially plotted on the Rural Development Framework in order to determine whether these are aligned to the underlying Rural Spatial Concept/Rationale for the area
- 5.4. Once the District Rural Development Sector Plan for the two districts are completed, it is submitted as input to the Municipal IDP (District or Metro) from where it feeds into the District Development Model.

## 6. SCOPE OF THE PROJECT

- 6.1. This project entails the review of the Harry Gwala and Ugu District's District Rural Development Sector Plans located in the Province of KwaZulu-Natal. The service provider should identify or confirm Priority Rural Intervention Areas for integration in the DDM.
- 6.2. It is imperative that a study/analysis of the space economy is undertaken in terms of Rural Development Framework. It is also important to note that the plan is not to develop another rural SDF especially if the municipalities have an existing SDF but to build and strengthen the rural development component of the existing plan/s within a municipality.

- 6.3. The district should be looked at in terms of its functional rural space and not be confined to Municipal Boundaries in order to achieve vertical and horizontal spatial coordination. The successful service provider/s will be required to identify Priority Rural Intervention Areas regions in the jurisdiction of the Harry Gwala and Ugu District Municipalities.
- 6.4. The District Rural Development Sector Plan should aim to integrate the work of the different Branches in the Department and to avoid working in silos towards one common vision of the Department.
- 6.5. The plan will help integrate different Branches' work within the DALRRD to facilitate inter-governmental coordination and integration towards the development of these rural areas.

The plan is also intended as a spatial targeting tool of the Department in space to ensure coordinated and integrated planning is realised.
- 8.3. The departmental programmes from all the branches aimed at creating a viable rural space, should be aligned and inform rural development sector plans. All government sectors should be roped in so that there is no competition amongst the different sectors, but well-coordinated services delivery programmes that will result in the improvement of rural areas livelihoods.

- 8.4. Recognition of traditional leaders is imperative, since vast majority of the land in rural areas is under their leadership or management and any success of the programme or project could be influenced by their involvement.
