FINAL AREA PLANTED AND CROP PRODUCTION FIGURES OF COMMERCIAL MAIZE, SUNFLOWER SEED, SOYBEANS, GROUNDNUTS AND SORGHUM FOR 2021

At a meeting held on 10 February 2022, the Crop Estimates Liaison Committee (CELC) oversaw the process for the finalisation of the crop production figures of commercial white and yellow maize, sunflower seed, soybeans, groundnuts and sorghum for 2021.

The estimated total production figures as released by the national Crop Estimates Committee (CEC) were revised, using the published figures of the South Africa Grain Information Services (SAGIS) of actual deliveries as the basis for the calculations. The figures from the maize utilisation survey to determine on-farm usage and retentions, which was conducted by the Department of Agriculture, Land Reform and Rural Development (DALRRD) and the telephonic survey conducted by the National Crop Statistics Consortium (NCSC), were added to the SAGIS delivery figures to calculate the final crop production figures.

Comparing the final calculated crop figures with the numbers set by the CEC during November 2021, the size of the commercial maize crop is now 16,315 mill. tons, which is 0,50% or 80 735 tons more than the final crop estimate figure of 16,234 mill. tons. For white maize, the recalculated crop size is 8,600 mill. tons, which is 0,10% or 8 815 tons less than the final crop estimate figure, and for yellow maize the recalculated crop size is 7,715 mill. tons, which is 1,17% or 89 550 tons more than the final crop estimate figure.

In the case of the commercial sunflower seed crop, the final calculated crop figure is now 678 000 tons – 0,11% or 760 tons more than the final crop estimate figure of 677 240 tons. The soybeans crop is 1,897 mill. tons (up by 0,35% or 6 550 tons), whilst the groundnuts crop is 64 300 tons. The sorghum crop were slightly adjusted upwards by 0,63% (or 1 355 tons) to 215 000 tons.

CELC accepted the final recalculated crop production figures for 2021 (please refer to the figures in the accompanying tables).

The CEC would like to thank all producers and industry role-players who provided information on a regular basis to improve the accuracy of the crop estimates. Producers, who do not participate in the Department's monthly survey, are requested as a matter of urgency to make an effort to contribute to the crop estimates process.
