

# Animal Disease Reporting for the month July 2019

---

Sub-Directorate Epidemiology  
Directorate Animal Health  
04 December 2019

## Introduction

According to the Animal Diseases Act, 1984 (Act 35 of 1984) Controlled and Notifiable Diseases must be reported to the local State Veterinarian. The local State Veterinarian compiles a monthly report on diseases that occurred in his/her State Vet Area and submits this report to the Provincial Director of Veterinary Services. At a Provincial level, all these reports are combined to compile a disease report for the province and this report is submitted to the Sub-Directorate Epidemiology in the Directorate Animal Health at the Department of Agriculture, Forestry and Fisheries. All the provincial reports are combined to compile a national disease report.

### Purpose of disease reporting

Reasons for disease reporting are:

- Proof of freedom
- Detection of outbreaks of important diseases
  - Prevent the spread of the disease
  - Institute control programs
  - Eradication of a disease
  - Warn neighbouring farmers/trade partners/neighbouring countries
  - Prevent the spread/occurrence of a disease in humans, e.g. rabies
  - Decrease the economic impact of a disease
  - Prevent spread of diseases to trading partners
- Disease control

## Information and maps of Specific Diseases

### African swine fever (ASF)

During July 2019 one ASF outbreak was detected in the Koppies area of the Free State province, on a smallholding where acute mortalities were observed after the owner had visited a previously ASF affected communal area. Based on the post mortem findings of the state veterinarian and confirmation on PCR, ASF was diagnosed.

The following table indicates the number of reported ASF outbreaks per province
