What is rabies?

Rabies is a disease that affects the brain and leads to the death of the person or animal involved.

Symptoms vary widely and may include:

- Behavioural changes
- Aggression
- Salivation
- Paralysis.

RABIES AFFECTS ALL ANIMALS!

Spreading of the disease

The virus occurs in great numbers in the saliva of rabid animals.

How to control rabies

- Vaccination is the only protection.
- **Vaccinate** your dogs and cats. Encourage other people to have their pets vaccinated too.
- Do not allow your pet to roam the streets.
- Report all suspect cases to your nearest state veterinarian, animal health technician or to the police.

NEVER TOUCH OR CARESS A STRANGE, INJURED ANIMAL OR ONE WHICH APPEARS TO BE SICK!

If you get bitten

- Thoroughly disinfect the wound.
- Immediately consult a medical doctor or clinic.
- Contact your nearest state veterinarian or animal health technician.
